No. 40.—*Notification.*—The following is republished for general information :—

Extract from the Proceedings of the Government of India in the Home Department (Public), No. 2831-42, dated 8th December 1899.

The Secretary of State for India has brought to the notice of the Government of India that it not infrequently happens that natives of India, students or others, who have proceeded to England, desire to obtain passports to enable them to travel to foreign countries in which the possession of a passport is necessary or desirable, and that difficulty often arises from want of evidence to show that the applicant is a British subject and therefore entitled to a passport. Appeals for assistance are also frequently addressed to His Lordship by destitute Indians who desire to return to their country and by students who, owing to embarrassed circumstances, are unable to complete their course of education.

2. In order to enable the Secretary of State to deal with such cases satisfactorily, the Governor-General in Council has decided that it is necessary to press upon Indian students and others visiting England the desirability of providing themselves, before their departure from India, with an authoritative certificate of identity, in the form appended to this resolution, signed by the head of the district (in a Presidency town the Commissioner of Police) in the case of residents of British India and by the Political Officer in that of residents of Native States. For a student the certificate should be signed by the head of his last school or college and countersigned by the district officer (in a Presidency town the Commissioner of Police) or Political Officer, as the case may be.

NATIVE STATES.

The 15th January 1909.

No. 44.—*Notification.*—The following ceremonial observed at Máler Kotla on the occasion of the installation and investiture with powers of Nawab Ahmad Ali Khan of the Máler Kotla State on 5th January 1909 is published for general information :—

On Tuesday, the 5th January 1909, at 3·30 P.M., His Honour the Lieutenant-Governor held a public Darbar at Máler Kotla for the purpose of

formally installing Wali Ahd Ahmad Ali Khan and investing him with powers of administration as Nawab of Máler Kotla.

The Darbar was attended by the Civil and Military Officers of Government present at Máler Kotla and by the other guests and officials of the Máler Kotla State.

The entrance to the Darbar Hall was lined by State troops and a Guard of Honour, with a band, was drawn up outside.

Two high officials of the State waited on the Lieutenant-Governor at his residence for the purpose of conducting His Honour to the Darbar. His Honour was accompanied by his personal staff and the Chief Secretary to the Government of the Punjab.

The Nawab, accompanied by the Commissioner of the Jullundur division, met the Lieutenant-Governor as he alighted at the Darbar Hall.

On the arrival of His Honour at the Darbar Hall the troops presented arms, the band played and a salute of 15 guns was fired. The Nawab conducted His Honour to his seat in the Darbar Hall and all present rose.

On the right of the Lieutenant-Governor sat the Nawab of Máler Kotla, the Commissioner of the Jullundur division, the heir apparent, the relatives of the Nawab and the *Ahlkars* of the State in the order of their precedence. On the left of the Lieutenant-Governor sat the Chief Secretary to the Punjab Government and the other officers in attendance on His Honour.

Behind the seats first occupied by the Lieutenant-Governor and the Nawab there was a raised dais on which were placed two chairs of State, one of which represented a *Masnad*. When all had resumed their seats the Chief Secretary to Government rose and declared the Darbar open. The Lieutenant-Governor then addressed the Nawab of Máler Kotla in Urdu, the English version of the address being as follows:—

I do not propose on the present occasion to dilate on the duties and responsibilities of a Ruling Prince in India, as I recently had an opportunity of stating my views on the subject, and fortunately here in Máler Kotla it is unnecessary. The Nawab has for years exercised full powers as a Regent, and the knowledge that he has acquired of the art of government and the knowledge that his people and the British Government have gained during this period of his capacity is sufficient to enable us to predict that he will rule well and wisely. I would, however, ask the Nawab to bear in mind the fact that Máler Kotla is not a big State. Its sources of income are limited, and efforts should be made to reduce expenditure so as to maintain resources, by which the condition of the State can be improved. The only difficulty in the past in the Máler Kotla State has been due to friction between the Nawab and the Khawanin, and this friction has been largely due to some uncertainty as to their respective positions. That uncertainty has recently been removed, and of late happier relations have prevailed. I am sure that the Khawanin will do well to recognise that the Nawab is the head of the family, and that they owe due allegiance to him and ought to support him in maintaining the dignity of the State. If this goes down, the Khawanin must go with it, and I trust that they will always bear this in mind. At the same time it is advisable for the Nawab to pay due respect to his relatives and treat them always with kindness and consideration.

The State is fertile and prosperous, and I am glad to learn that it is free from disease. It is also a great pleasure to me to find that the railway line from Ludhiána to Jakhal, which I advocated during the rule of the late Nawab, has proved so great a financial success and has benefited this State so considerably that the net profits have risen to Rs. 6 per cent. It is unfortunate that complete security to agriculture was not afforded by an extension of the Sirhind Canal system, but this may even yet be possible if the supply in that canal can be increased by ponding or otherwise. Our Engineers are men of great resource, and I commend this possibility to their attention.

The State forces have shown their value on several difficult campaigns, and the British Government highly values the work done for the Empire by the Máler Kotla Imperial Service Sappers. The Nawab will, I feel certain, see that this corps does not lose anything of its present high reputation.

Now it only remains for me to discharge the honourable and pleasing duty of making over to the Nawab as such the administration of the State, and in doing so I congratulate him most heartily, and fervently wish him a long and prosperous rule during which he will have many opportunities of showing that he has benefited by the education which he received at the Aitchison College and the careful training which he has had under the officers from Colonel Grey downwards, who as Commissioners have acted as Political Agents of the State, and whose advice in the future will, as before, be ever available for him.

I declare Nawab Ahmad Ali Khan duly invested with the powers of a Ruling Chief of the State of Máler Kotla.

All present then rose, and His Honour, after placing a necklace round the Nawab's neck and attaching to his turban a *Sarpech* as the insignia of Chiefship, conducted the Nawab to the *Masnad*. The Chief Secretary to the Punjab Government then recited the Nawab's full titles,* and His Honour declared the Nawab invested with the powers of a Ruling Chief of Máler Kotla. The band in attendance played, and a salute of 9 guns was fired in honour of the Nawab.

* Nawab Ahmad Ali Khan, Bahadur, Chief of Máler Kotla.

The khillat of the Punjab Government was then brought in and conferred on the Nawab, His Honour handing a sword of State to the Nawab.

The Nawab then rose and replied to His Honour's address in the following terms:—

YOUR HONOUR,

I feel that I cannot adequately thank you for the honour you have done me and the State by coming over here to perform the ceremony of my installation and to invest me with the powers of a Ruling Chief. Although, as Your Honour has observed, I have gained some experience in the art of administration, having had to exercise the powers of the Nawab, my late lamented father, during his unfortunate illness, for some years, yet I can assure Your Honour that I have been deeply concious of the many responsibilities which go along with the exercise of power. I regard the present as the most solemn occasion of my life, and the sense of the responsibility of my position and the duty which I owe to the subjects of this State was never more clearly borne in upon me than now.

Your Honour, when in 1903 the administration of the State was entrusted to me I found that there were some questions, more or less important, awaiting settlement, a few of these, however, I am sure, could not have been settled owing to the unsatisfactory state of the health of my late father extending over many years. Not the less important of these questions was that relating to the position of the Khawanin in this State. And I may say that in my treatment of this somewhat difficult question I have been regardful of what is due to the dignity and the prestige of the State on the one hand, and the position of the Khawanin on the other. I am glad to be able to observe that the question has now sufficiently well advanced towards the stage of final settlement, and I trust that the Khawanin will recognise that in remaining loyal to the State they would be consulting their best interests, which are inseparably bound up with its dignity and solidarity. I shall always find it a real source of pleasure to conciliate the Khawanin who are distinguished by their position in the economy of this State from its other subjects.

Your Honour, has very justly taken pleasure in observing that the railway line constructed during the reign of my father has greatly benefited the State. Directly, it has benefited the State by increasing its revenues, and among the many indirect advantages that have followed it, has been the impetus given to the local trade and commerce. I fully share with Your Honour's feelings that complete security to agriculture was not afforded by an extension of the Sirhind Canal system to this State. But I trust I am not going too far when I say that, with Your Honour's powerful support, the inventive genius of the English Engineers will find a way to increasing the supply of water in the canal to the immense benefit of this State as by Your Honour's able and far-sighted advocacy in the past the construction of the railway line has proved to be such a valuable source of financial prosperity to it.

I am proud to be told by Your Honour that the services of the Máler Kotla Imperial Sappers are appreciated by the British Government. My interest in that corps is as old as its organisation, and I may well assure Your Honour that it is of too deep and abiding a nature to make me suffer the least deterioration in its present high state of efficiency.

Your Honour, the State which I represent to-day in my person as its Chief has always been proud of its allegiance to the British Crown and conspicuous by its loyalty to the Empire. And the British Government may well depend upon the loyalty of Máler Kotla in the future as it has done in the past. I will not only maintain these loyal traditions in their unabated vigour, but will not for a moment suffer them to be weakened by the import of those ideas into the limits of this State which in some parts of the country have caused anxiety to the ruling authorities.

I beg Your Honour to allow me to avail myself of this occasion to express my deep sense of gratefulness to all those British officers including Colonel Grey, C.I.E., and Colonel Davies, the present Political Agent for this State, who have taken a keen, for some of whom I may say paternal, interest in my education and training, and assisted me by their advice in the administration of the State in my capacity as Regent. I once more thank Your Honour most cordially for the trouble you have taken in coming over here and for the honour done to me by investing me with full powers of a Ruling Chief of this State.

On the conclusion of the Nawab's reply, the heir apparent, the relatives of the Nawab and the officials of the State were presented to His Honour by the Commissioner of Jullundur and offered *nazars* of one gold *mohar* each, which were touched and remitted.

Attar and *pan* were given to the Nawab by His Honour, to the heir apparent by the Chief Secretary, to the Nawab's brother and relatives by the Aide-de-Camp to the Lieutenant-Governor, and to his *Ahlkars* by the Mir Munshi of the Punjab Government. His Honour then left the Darbar under the ceremonies observed on his arrival.

AGRICULTURE.

The 5th March 1909.

No. 54.—Notification.—The following prospectus showing the objects, the terms and the curriculum of the Punjab Agricultural College at Lyallpur has been approved by His Honour the Lieutenant-Governor, and is published for general information:—

PROSPECTUS OF THE PUNJAB AGRICULTURAL COLLEGE, LYALLPUR.

Objects of the College.

The Punjab Agricultural College has been founded and endowed by Government in order to provide a thorough course of instruction in the sciences which have a bearing on agriculture and also in the practice of agriculture. In the last 50 years the application of science to agriculture has brought numerous and material advantages to agriculturists in Europe and America. Barren land has been made culturable; the fertility of poor soils has been increased; new varieties of crops have been introduced; varieties of existing crops have been improved as regards quality and yield, or rendered immune against disease; practical methods of coping with insect pests have been discovered; and labour-saving machines have been devised which have lowered the cost of production. In time, results of no less value should be within the achievement of scientific research in the Punjab, with the co-operation of private agriculturists who have the training and knowledge requisite to take the fullest advantage of the discoveries of science and of the experience of skilled agriculturists in other countries. The main object of the Agricultural College is to give such a combined and systematised course of agriculture and science as will enable it to send out men who will be competent to further the progress of agriculture on the most approved, economical and up-to-date lines either as managers of their own estates or as land agents.

Control and management.

2. The College will be under the control of the Director of Agriculture with the advice of the Director of Public Instruction, while the executive charge will be vested in a Principal assisted by a staff of English Professors and a suitable number of Assistant Professors and Laboratory Assistants.

Courses.

3. The courses will extend over three years and will be in English. The principal subjects of study will be agriculture including geology and the study of soils, chemistry, physics and botany. In addition, short courses will be given in the various subjects which have an important bearing on the practice of agriculture, such as economic entomology, agricultural engineering, veterinary science, farm and estate management, the revenue and tenancy systems of the Province, and the laws of production and distribution.

Qualifications for admission.

4. The minimum qualification for admission will be the Entrance Examination of the Punjab University or the diploma of the Aitchison College. A preference will be given to applicants with some knowledge of science. The Director of Agriculture, however, has power to admit a candidate who has not obtained the above qualifications, but whose knowledge is sufficient to enable him to assimilate the College training.

Terms.

5. The terms will be as follows:—

First term: 20th July to 20th December, with a fortnight's vacation at the Dushera.

Second term: 10th January to 20th May.

A fee of Rs. 30 will also be paid by each student entering the College as caution money to cover the cost of any damage due to a wilful or negligent act done by him to the College or boarding-house property. This fee will be returned at the end of the course if the College authorities have no claims against a student.

Examinations for the diploma of Licentiate in Agriculture.

7. There will be no Entrance Examination for students who possess the qualifications noted in paragraph 4 above, unless the number of applicants exceeds the number which can be received, in which case an Entrance Examination will be held at Lyallpur at the same time as the Entrance Scholarship Examination referred to in paragraph 8 below, that is, on about May 15th. The subjects will also be the same as in the Scholarship Examination.

There will be a College examination at the end of the first and second year's course. A student must have passed the examination prescribed for each year's course and produce a satisfactory schedule of work signed by the Professors under whom he has been working before he is permitted to take up the next year's course.

At the end of the third year there will be a final examination for the diploma conducted jointly by the College staff and co-adjutors from outside. In granting a diploma the examiners will take into consideration the whole work of the student during his three years' course, marks being allowed for the work done at the terminal and annual examinations. The list of successful students will be divided into first and second class, the diplomates in the first division being placed in order of merit.

Entrance scholarships.

8. Ten scholarships will be provided each year of the monthly value of Rs. 10 per mensem and tenable for three years. EMIGRATION.

RESOLUTION.

Dated Simla, the 22nd April 1909.

The following translation of an order passed by the Governor of German New Guinea, respecting the immigration and introduction of non-indigenous natives into the Protectorate of German New Guinea is published for general information :—

TRANSLATION.

Order of November 1st, 1908.

In virtue of section 15, of the Protectorate Law (Reichs-Gesetzblatt, 1900, page 813) and of the Imperial Chancellor's Decree of September 27th, 1903, (Deutsches Kolonialblatt, 1903, page 509), the following is decreed for the Protectorate of German New Guinea.

SECTION 1.

Non-indigenous natives may only immigrate or be introduced into the Protectorate of German New Guinea by the ports that are open to foreign traffic.

Anyone who wishes to introduce such natives under a definite labour contract otherwise than by the ports that are open to foreign traffic, must obtain the written permission of the registration authorities (Meldebehörde) of the port of entry.

Ship-masters must present to the registration authorities of the port of entry a list of the non-indigenous natives to be landed there.

SECTION 2.

Every non-indigenous native immigrating into the Protectorate must within 3 days after landing report himself to the authorities of the port and make a statement for purposes of identification. Thereupon a certificate will be given to him.

The authorities may order a medical inspection.

If a person who is under the obligation to report himself leaves the Protectorate or changes his domicile within the Protectorate from one district to another, he must announce his arrival and departure in the same manner.

SECTION 3.

Whoever in the Protectorate introduces non-indigenous natives under a definite labour contract is bound to deliver to the authorities within 3 days from the landing a copy of the contract and a list of names in duplicate. If there is no labour contract, one must be drawn up before the authorities of the port of landing.

The obligation of making an announcement to the authorities of the place where the work is carried out takes effect in the same manner on the renewal or prolongation of an existing arrangement or contract for working. The authorities may order the native to appear personally and be medically examined.

The costs of the examination and reception of needy or sick persons into an institution are borne by the employer and not by the official authorities.

The workmen introduced may only be employed after the facts of their having reported themselves and being fit to work have been certified on the second copy of the list of names.

SECTION 4.

The authorities must supervise the arrangements for working and must especially examine the lodging, provisioning, medical attendance and wages of the workmen. The authorities have the right to undertake inspections or to order inspections to be made by suitable experts or by a committee, and to take steps to remove evils. Should the inspection show that the employer is not fulfilling his obligations, he must bear the costs of such inspection.

SECTION 5.

On the authorities' demand the employer is bound on the termination of the labour contract to send the workmen back to the place where they were engaged, or to pay the costs of the return. This obligation is cancelled after the space of one year from the termination of the arrangement.

The employer is obliged to announce to the authorities the termination of the arrangement and the return of the workmen to their home, and he is obliged to give information on demand concerning each workman in his service.

The authorities may order a medical examination of the workmen to be sent home to be made at the cost of the employer.

SECTION 6.

Any workman who after the conclusion of his working arrangement with the employer still remains in the Protectorate, is bound to report himself in accordance with section 2 to the competent authority for his place of residence.

SECTION 7.

The authorities to whom such reports must be made are the Imperial District Offices and Stations for their Districts.

SECTION 8.

A fee for these declarations is to be paid for each person in accordance with section 3; it amounts to 10 marks in the old Protectorate 20 marks in the Island Territory and 30 marks in case the contract lasts longer than 2 years.

If a labour contract or agreement is renewed or prolonged, the same fees are charged.

SECTION 9.

Infringements of the provisions of this order are punished by a fine not exceeding 600 marks or by imprisonment for a period not exceeding 3 months.

SECTION 10.

This order comes into force on April 1st, 1909.

The non-indigenous natives already settled in the Protectorate on that day are bound to report themselves in accordance with section 2 within a space of 3 months; in accordance with section 3 the employers must, within the same period, report the names of the workmen in their service on the day when the order comes into force.

SECTION 11.

On the day when this Order comes into force the following will be cancelled.

The Order of the Governor of German New Guinea of February 1st, 1904 concerning the immigration and introduction of Chinese into the Protectorate of German New Guinea with the exception of the Island Territory of the Carolines, Pelew and Mariannes (Deutsches Kolonialblatt, 1904, page 153) and the provisions for carrying out this Order, of February 1st, 1904 also the change in the Order regarding the engagement and introduction of coloured workmen of January 20th, 1907. MILITARY.

The 1st May 1909.

Notification in connection with the supply of transport and carriage required for military purposes during peace time.

No. 146.—*Notification.*—Whereas His Honour the Lieutenant Governor has considered the matters relating to the supply of transport and carriage required for military purposes otherwise than on account of mobilization for active service, set forth in circular No. 46, section D, of the circulars issued by the Financial Commissioner, Punjab, and hereto annexed, and whereas he is satisfied that the said matters so far as they relate to the periods, terms and conditions of impressment for hire are both reasonable and necessary :

His Honour the Lieutenant-Governor is pleased, in modification of Punjab Government notification No. 352, dated 1st December 1903, and under the provisions of section 25 (1) of the Punjab Military Transport Animals Act, I of 1903, to authorise all Collectors of all districts of the Punjab to impress, for hire, animals and vehicles and gear and equipment of animals, in accordance with the said section of the said circular, for military purposes other than on an occasion of the mobilization of troops for active service : provided that the following animals shall be exempt from impressment, namely,—

(*i*) an animal branded under the provisions of the Act, and

(*ii*) a token animal, proved to be such by the production of the counterpart of the agreement referred to in rule VII (3) of the rules issued under the Act in Punjab Government notification No 351, dated 1st December 1903, unless the impressment of such token animal is authorized under the terms of the agreement.

D.—CARRIAGE.

I.—The following are the Military Rules on this subject—*vide* Appendix VII, Army Regulations, India, Volume X, Edition 1904 :—

1. Requisitions on the civil authorities for hired carriage required for the movements of troops or stores should be prepared on I. A. F. S. 1675, giving full details of requirements, and sent so as to reach the District or Political Officer concerned, if possible, not less than fifteen days before the carriage is required.

2. Hired carriage will not ordinarily be required to proceed beyond the limits of the next civil district on the route, but will be exchanged, if possible at such stations therein as may be fixed by the local civil authorities. It will be paid for at the authorized local hire rate from the date on which the march is commenced to the date of its discharge, both inclusive, but if taken double marches, double rates will be paid for each such march Return hire will only be admissible when the carriage is necessarily taken beyond the limits of the next civil district when half the full hire rate will be paid for each route-book or other recognised stage on the return journey, without any allowance for halts. When circumstances render it necessary to collect the carriage before the date on which it is required, the full hire rate will, however, be paid from the actual date of engagement, but in such cases the indenting officer should be informed of the circumstances and the probable extra expense that will be incurred. Similarly any carriage indented for, which may be found to be in excess of final requirements and discharged before the march commences, will be paid for at the full hire rate for each day or part of a day for which it is retained. If carriage is declared unserviceable by a committee of officers, it will not be paid for. When chaudhris are engaged to collect carriage, their fees at local rates will be paid by the owners and not by the Military Department.

3. On engagement of the carriage, the civil or political officer will advance to the owners half the estimated hire for the full journey, and will then send the carriage to the place required in charge of a tahsil or darbar official, who will hand to the requisitioning officer a detail of the composition of the carriage, authorised loads, hire rates, owners' names, amount advanced and receipts for the same, and intimation as to the station at which the carriage should be exchanged (see I. A. F. S. 1675). The amount advanced will be at once repaid to the civil officer by the Supply and Transport Corps.

4. The civil officer supplying the carriage will at the same time warn the civil officer at the first exchanging station of the transport requiring exchange, and the date and place at which it will be required. The latter will then proceed as in paragraph 3 and warn the next exchanging station. Similar action will be taken at each exchanging station on the route.

5. Should any change be required *en route* in the original quantity and description of transport supplied, the Officer Commanding the troops must give the civil officer at the exchanging station concerned as much notice as possible.

6. Carriage breaking down between exchanging stations should be replaced on the spot in communication with the local civil officials, and paid off. If the advance received has not been liquidated, the owner must refund the amount then due.

7. On arrival at an exchanging station or at destination, the carriage should be at once released and paid off by the Supply and Transport Officer if there is one, otherwise by a British officer of the marching unit in the presence of the civil official attached to the troops, the acquittance roll being signed by both and countersigned by the Officer Commanding. Any disputes will be referred to and settled by the district civil officer at the place at which the transport is released.

8. When carriage is discharged, a certificate in English and the Vernacular should be given by the civil officer at the exchanging station or by the civil officer accompanying the troops, to each person in charge thereof, to protect the carriage from being taken for the use of troops while on its return journey, unless such troops are marching in the direction of the owner's home. If so employed, the full hire rate will be paid.

[*Paragraph* 219, *Army Regulations, India, Volume X.*]

9. The Officer Commanding will be responsible that animals are not overladen nor ill-treated and that on arrival at destination or an exchanging station all carriage is released as early as possible. Animals must always be unloaded when crossing rivers in boats. Hired transport establishments not being amenable to military discipline, any serious misbehaviour on their part must be dealt with in communication with the civil authorities.

II.—The following supplementary rules are issued by the Financial Commissioner with the approval of the Local Government:—

1. The responsibility for the supply of carriage for the movement of troops or for individuals in Military employ, authorised to travel at the public expense, or for stores, rests in the first instance, with the Supply and Transport Corps. It is only when that Corps is unable to meet the demands that a call will be made on the Civil authorities.

2. A copy of Form I. A. F. S. 1675, referred to in rule I-1 is given as Appendix A to this Circular; the exchanging stations referred to in rule I-2 are detailed in Appendix B and the local hire rates in Appendix C.

3. The cost of return hire for carriage taken beyond an exchanging station rule I-2 will be a charge against the Military Department if the Commanding Officer of the regiment has failed to give due notice of his requirements, or if a relief has been provided by the Civil Officer responsible but has not been taken up by the regiment or detachment for which it is supplied. If such relief has not been provided in spite of due notice to the Civil Officer, the excess payment will ordinarily be a charge against the Civil Department. The District Officer should report to the Commissioner each case in which he has declined to furnish a relief, assigning reasons for the same. The Commissioner will notice any cases in which the reasons are not satisfactory; for much of the hardship entailed under existing arrangements upon owners of cattle is owing to the rules regarding relief not being attended to.

4. For carriage employed in any part of the Punjab during the rainy season, or between the 1st of June and 1st of October, an additional charge will be made equivalent to 25 per cent. on the hire that would be leviable according to the local rates. This rule is subject to the special provisions of the Simla rules, which allow half-rates for halts and back hire in certain cases, and dispense with the additional charge of 25 per cent.

5. Ordinarily chaudhris will arrange with the owners of carriage as to the scale of fees to be paid, but, in the absence of any special engagement, they will be entitled to 6 pies or half-an-anna per rupee on the total hire due for carriage from the station at which it is engaged to the station at which it ought to be relieved. In the case of coolies and bearers the chaudhris' fees will be 6 pies or half-an-anna per man.

6. An exception to the Military Rule, which lays down that chaudhris' fees will be paid by the owners, exists in the Simla district, where chaudhris' fees are added to the rates of hire fixed by the Local Government, and are therefore paid by the hirers of carriage.

7. (*i*) The Civil Officer furnishing the carriage is bound to see that the advance referred to in rule I-3 is made before the carriage is made over to the applicant. He is also bound, before granting the passport referred to in rule I-8 and formally discharging the carriage, to satisfy himself that the owners have been paid in full according to the prescribed rates.

(*ii*) This advance will be drawn from the treasury on a simple receipt, and on its being recouped by the Supply and Transport Corps, will be refunded into the treasury.

8. The owner of carriage should be supplied with a copy of the requisition filled up in English and Urdu characters.

9. All tolls will be payable by the hirer of carriage in cash or by free pass.

10. The rules and tables of rates should be hung up in dâk bungalows, serais, tahsils, thanas and other public places.

11. Monthly rates, when not specified, will be determined by mutual agreement.

12. For the purpose of calculating remuneration for carriage, a part of a stage must be treated as equivalent to a whole stage.

13. The authorized loads, except in the Rawalpindi district, are as follows :—

	Description of carriage.	Load.		
		Pacca road in plains.	Katcha road.	Hill road.
1	Bullock train carts, 4-wheeled ...	30 maunds ...	30 maunds ...	24 maunds

* The maximum load on the Simla-Kálka road *for the down journey* will be 12 maunds for a two-bullock cart and 16 maunds for a three-bullock cart.

For maximum loads in the Rawalpindi District, see Appendix C to this circular.

He may present himself for examination in any or all of the groups of subjects.

XII.—A candidate will be held to have passed in a group by the Higher Standard if he obtains two-thirds of the maximum of marks allotted to that group, and when a group contains more than one subject, one-half of the maximum of marks allotted to each of its subjects in addition to the two-thirds for the group as a whole. He will be held to have passed by the Lower Standard if he obtains one-half of the maximum of marks allotted to a group and when a group contains more than one subject, one-third of the maximum of marks allotted to each of its subjects in addition to the one-half for the group as a whole:

XIII.—No Assistant Commissioner or Probationary Extra Assistant Commissioner acquainted with English shall be held to have passed the examination in Treasury and Local Fund Accounts by either standard until the Deputy Commissioner of the district to which he is attached shall have furnished a certificate that he has duly attended to and satisfactorily discharged the duties of Treasury Officer for a period of not less than six weeks, continuously, within one year of the date of the examination. If he has passed by the Lower Standard only, a second certificate will be required before he can be considered to have passed by the Higher Standard, unless at the time of the examination at which he presents himself for the Higher Standard less than a year has elapsed since he was last in charge of a treasury.

The required certificate in the annexed* form should accompany the notice of his intention to appear at the Departmental Examination, and will be forwarded to the Accountant-General with the answer papers. Native candidates who are exempt from examination in Group C will be passed "with credit" if they obtain three quarters of the maximum of marks allotted to Group B alone.

XV.—In making the calculation under Rules XII and XIII, the marks allotted to any question which a candidate is not required to answer and to any paper or subject in which he is not required to be examined shall first be deducted from the maximum of marks allotted to the paper, subject or group, as the case may be.

XII.—A candidate will be held to have passed in a group by the Higher Standard if he obtains two-thirds of the maximum of marks allotted to that group, and when a group contains more than one subject, one-half of the maximum of marks allotted to each of its subjects in addition to the two-thirds for the group as a whole. He will be held to have passed by the Lower Standard if he obtains one-half of the maximum of marks allotted to a group, and when a group contains more than one subject, one-third of the maximum of marks allotted to each of its subjects in addition to the one-half for the group as a whole:

If he has passed by the Lower Standard only, a second certificate will be required before he can be considered to have passed by the Higher Standard, unless at the time of the examination at which he presents himself for the Higher Standard less than a year has elapsed since he was last in charge of a treasury.

The required certificate in the annexed* form should accompany the notice of his intention to appear at the Departmental Examination, and will be forwarded to the Accountant-General with the answer papers. Candidates for the post of Extra Assistant Commissioner will be required to procure the certificate within a year from the date of their appointment as Extra Assistant Commissioners.

if they obtain three quarters of the maximum of marks allotted to the group or groups, and, when the group contains more than one subject, two-thirds of the maximum of marks allotted to each of its subjects in addition to the three-quarters for the group as a whole. Native candidates who are exempt from examination in Group C will be passed "with credit" if they obtain three-quarters of the maximum of marks allotted to Group B alone.

XV.—In making the calculation under rules XII and XIII, the marks allotted to any question which a candidate is not required to answer and to any paper or subject in which he is not required to be examined shall first be deducted from the maximum of marks allotted to the paper, subject or group, as the case may be.

XVI.—No Assistant Commissioner, Extra Assistant Commissioner, or Probationary Extra Assistant Commissioner will be invested with the powers of a Magistrate or Munsif of the 2nd class until he has been six months in public employ and has passed or been exempted from passing the examination by the Lower Standard in Law and where necessary in Urdu, or be invested with the powers of a Magistrate or Munsif of the 1st class until he has exercised 2nd class powers for six months and has passed or been exempted from passing by the Higher Standard in the same subjects.

(*iii*) No candidate for the Tahsildars standard in this examination will be allowed to answer in Jails or Treasury unless he is an accepted candidate for the post of Extra Assistant Commissioner.

XVIII.—The papers of Tahsildar and Munsif examinees who under rule XVI elect to answer the questions prescribed for Assistant and Extra Assistant Commissioners shall be examined and marks awarded by Examiners nominated by the Financial Commissioner and the Judges of the Chief Court respectively and approved by Government, and the final decision as to the passing of such candidates will rest with the Financial Commissioner in the case of Tahsildar examinees and with the Judges in that of Munsif examinees.

Vaccination season.

NOTE FOR VACCINATORS.—Although the Vaccination Act does not render liable to punishment the omission to get children under age of six months vaccinated, yet it is very desirable that children should be vaccinated at an earlier age. As a rule, all healthy, unprotected children over one month old presented for vaccination should be vaccinated by the public vaccinator.

6. During the vaccination season each public vaccinator shall be bound to attend at the vaccine station to which he may be attached by the Civil Surgeon on the days and hours fixed for such station, and he shall reside in the municipality.

Time of attendance of public vaccinators, and their residence.

7. The lymph to be used in the performance of vaccination shall be pure lymph obtained on the fifth day taken from the udder or from the soft skin in the neighbourhood of the udder of a buffalo calf under the age of one year which is free from contagious disease and has perfect full sized vesicles, or vaccine paste prepared from the buffalo calves at the recognised provincial vaccine depôts.

Nature of lymph to be ordinarily used.

8. If the parent or guardian of a child produced for vaccination desires that human lymph should be used, the vaccinator shall comply, and the lymph shall be taken from a child, subject to its parent's or guardian's consent, that has two perfect vesicles left untouched on the arm to run their regular course.

Vaccination by human lymph.

9. Not more than two children shall be vaccinated from each full-sized vesicle opened for the purpose of extraction of lymph and not more than 60 children from a single buffalo calf or six children from a single child.

Number of children to be vaccinated from each vesicle or from each buffalo calf on child used for the supply of lymphs.

10. Persons desirous of procuring the vaccination of their children at their own houses shall intimate the fact to one of the public vaccinators who, out of the hours of his public duties, shall arrange with the applicant to vaccinate the child. A fee of Re. 0-8-0 shall be payable to a public vaccinator who so vaccinates a child elsewhere than in the station for which such vaccinator is appointed.

Facilities for procuring vaccination of children at private houses, and the fee payable to a public vaccinator for an operation (outside his own circle).

11. Persons licensed by the Local Government to act as private vaccinators shall in no case demand a higher fee than one rupee for a single operation, and shall perform their duties under the orders and subject to the general control of the Civil Surgeon.

Fees chargeable by private vaccinators and the authority to which they are subject.

12. If the result of the first vaccination is a failure, the child should be re-vaccinated. If this second operation is also a failure, a third attempt should be made. If this also is unsuccessful, it is needless to repeat it again.

Re-vaccination, and age of the child.

13. Whenever it is ascertained that a child is unfit for vaccination or is insusceptible of successful vaccination, a certificate shall be granted in the former case to the parent or guardian of such child by the vaccinator in form A attached to these rules, and in the latter in the form B by the Civil Surgeon or other medical officer in charge of the local dispensary. In like manner, whenever it is ascertained that a child has been successfully vaccinated, a certificate shall be granted by the vaccinator to the parent or guardian of such child in the form C attached to these rules.

Grant and form of certificate of successful vaccination; unfitness for, or insusceptibility of, vaccination.

Registers to be kept by the municipal committee.

14. The following registers shall be kept up by the municipal committee :—

(*a*) A register showing the names of children born within the local area subject to these rules on and after the date of the application of Act XIII of 1880 to such area.

(*b*) A register showing the names of unprotected children born in the area aforesaid previous to the date of the application of Act XIII of 1880, and who were at that date under the age of 14 years if boys and of 8 years if girls.

(*d*) A register showing the result of each vaccination or its postponement, and the delivery of certificate, if any.

Rules for the preparation of the registers.

15. The preparation of register (*a*) shall be effected from the register of births maintained in the municipal office; of registers (*b*) and (*c*) from the information to be collected under the orders of the President of the municipal committee; of register (*d*) from the report submitted by the vaccinator as hereinafter prescribed.

1. These rules apply to the waste and uncultivated areas within the boundaries of the villages in the tahsil of Ráwalpindi in the Ráwalpindi district specified in the schedule hereunto annexed.

Under the authority contained in the 5th of the Governor-General's rules; it is hereby declared that all village residents are entitled to wood for their agricultural and domestic purposes from the trees and shrubs of spontaneous growth produced by the waste lands of the villages in which they reside. Ordinarily no charge shall be made on account of this privilege; nor shall any permission be requisite prior to its exercise. But under special circumstances, for sufficient reason shown, the Deputy Commissioner may impose a fee, or require a written application, for the felling of timber.

4. Under the authority contained in the 7th of the Governor-General's rules, the partition or cultivation of uncultivated hill lands held in common, whether actually bearing timber and brushwood, or suited to such a purpose, is prohibited, except in cases in which the persons desiring the partition or cultivation can show that the operation will leave sufficient provision for the exercise of the privileges granted by the preceding rule.

5. Under the same authority the sale or export of wood of spontaneous growth grown in village waste land or of any substance prepared from or by the aid of such wood beyond the boundaries of the village in the waste land of which the wood has grown is prohibited except with the permission in writing of the Deputy Commissioner previously obtained. Such permission shall not be granted except in special cases, where the proposed sales or exports will not interfere with the due supply of the residents of the village and its vicinity. This rule does not prohibit the preparation of surkhi and charcoal by villagers for their reasonable wants.

6. Nothing in these orders shall be construed—

(1) as conferring privilege in demarcated rakhs;

(2) nor so as to affect cultivated trees;

(3) nor so as to warrant the cutting of timber and fuel for sale by persons who are not proprietors of the land on which it is cut;

(4) nor so as to restrict the Deputy Commissioner or Forest Officers in their management of Government rakhs.

7. Any person who may infringe any of the above rules shall be punished for each offence with a fine which may extend to rupees one hundred and in default of payment with imprisonment which may extend to three months.

No. 578.—*Notification.*—The following rules for the regulation of vaccine operations in the municipality of Gohána in Rohtak district framed under section 19 of Act XIII of 1880 by the municipal committee of Gohána at a special meeting have been confirmed by His Honour the Lieutenant-Governor and are published for general information. They will come into force six weeks from the date of the publication of this notification: —

RULES.

1. The municipal committee shall, from time to time, appoint public vaccine stations for the municipality at such places as the Civil Surgeon may, in consultation with the committee, approve, and shall similarly fix the days and hours at which such stations shall be open, and shall cause to be affixed on the outside of every such place in a conspicuous position a signboard on which shall be printed in letters easily legible, and in English, Urdu and Nagri characters, the following inscription:—

Gohána Municipal Vaccine Station open (day) from (hour) to (hour)

and these stations shall be numbered and known as No. 1, No. 2 and so on, respectively.

2. For each public vaccine station the municipal committee shall appoint one public vaccinator. Every such public vaccinator shall ordinarily wear a distinguishing badge consisting of a red cross on white ground, and this shall be worn on the breast.

3. No person shall be appointed a public vaccinator unless he has obtained a certificate from the Sanitary Commissioner of the Punjab that he is duly qualified to perform vaccination as prescribed by Act XIII of 1880.

4. The appointment, suspension and dismissal of every Superintendent of Vaccination and public vaccinator employed within the limits of the municipality shall rest with the district board subject in the case of those entitled to pension from Government to the approval of the Sanitary Commissioner, Punjab.

5. The vaccination season will extend from 1st November to 31st March.

Note for vaccinators.—Although the Vaccination Act does not render liable to punishment the omission to get children under the age of six months vaccinated, yet it is very desirable that children should be vaccinated at an earlier age. As a rule, all healthy unprotected children over one month old presented for vaccination should be vaccinated by the public vaccinator.

6. During the vaccination season each public vaccinator shall be bound to attend at the vaccine station to which he may be attached by the Civil Surgeon on the days and hours fixed for such station, and he shall reside in the municipality.

7. The lymph to be used in the performance of vaccination shall be pure lymph obtained on the fifth day taken from the udder or from the soft skin in the neighbourhood of the udder of a buffalo calf under the age of one year which is free from contagious disease, and has perfect full sized vesicles, or vaccine paste prepared from the buffalo calves at the recognized Provincial Vaccine Depôts.

8. If the parent or guardian of a child produced for vaccination desires that human lymph should be used, the vaccinator shall comply, and the lymph shall be taken from a child, subject to its parent's or guardian's consent, that has two perfect vesicles left untouched on the arm to run their regular course.

9. Not more than two children shall be vaccinated from each full-sized vesicle opened for the purpose of extraction of lymph, and not more than 60 children from a single buffalo calf or six children from a single child.

10. Persons desirous of procuring the vaccination of their children at their own houses shall intimate the fact to one of the public vaccinators who, out of the hours of his public duties, shall arrange with the applicant to vaccinate the child. A fee of annas 8 shall be payable to a public vaccinator who so vaccinates a child elsewhere than in the station for which such vaccinator is appointed.

11. Persons licensed by the Local Government to act as private vaccinators shall in no case demand a higher fee than one rupee for a single operation, and shall perform their duties under the orders and subject to the general control of the Civil Surgeon.

12. If the result of the first vaccination is a failure, the child should be re-vaccinated. If this second operation is also a failure, a third attempt should be made. If this also is unsuccessful, it is needless to repeat it again.

13. Whenever it is ascertained that a child is unfit for vaccination or is insusceptible of successful vaccination, a certificate in Form A attached to these rules shall be granted in the former case to the parent or guardian of such child by the vaccinator and in the latter in the Form B by the Civil Surgeon, or other Medical Officer in charge of the local dispensary. In like manner, whenever it is ascertained that a child has been successfully vaccinated, a certificate shall be granted by the vaccinator to the parent or guardian of such child in the Form C attached to these rules.

14. The following registers shall be kept up by the municipal committee:—

(*a*) A register showing the names of children born within the local area subject to these rules on and after the date of the application of Act XIII of 1880 to such area.

(*b*) A register showing the names of unprotected children born in the area aforesaid previous to the date of the application of Act XIII of 1880, and who were at that date under the age of 14 years, if boys, and of 8 years, if girls.

(*c*) A register showing the names of unprotected boys and girls respectively, under these ages brought within the local area aforesaid at any time after the application of Act XIII of 1880, and who had resided there for a month.

(*d*) A register showing the result of each vaccination or its postponement, and the delivery of certificate, if any.

15. The preparation of register (*a*) shall be effected from the register of births maintained in the municipal office; of registers (*b*) and (*c*) from the information to be collected under the orders of the President of the municipal committee; of register (*d*) from the report submitted by the vaccinator as hereinafter prescribed.

16. Every public and private vaccinator employed within the local area to which these rules apply shall keep up the following registers, namely:—

Register (*a*) showing—

(1) name, sex, age, parentage, caste and residence of each child vaccinated;
(2) date of operation;
(3) date of inspection after vaccination;
(4) result, whether successful or unsuccessful;
(5) date of second operation, if first unsuccessful;
(6) date of inspection after re-vaccination;
(7) result, whether successful or unsuccessful;
(8) date of third operation, if first and second unsuccessful.

Register (*b*) showing—

(1) name, sex, age, parentage, caste and residence of each child produced, but found unfit for vaccination;
(2) date of certificate of postponement granted under section 9 of Act XIII of 1880;
(3) date on which the child was re-presented for vaccination, and the result of inspection;
(4) date of renewal of postponement certificate, if any;
(5) remarks.

N. B.—If on the child being re-presented for vaccination it is found to be in a fit state for that operation, the fact should be recorded in column 3 of Register B, and an entry of the fact of vaccination when performed should be made in Register A, a reference to such entry being made in the column of remarks of Register B, opposite the corresponding entry in latter.

17. Every public or private vaccinator shall prepare a monthly report during the vaccination season on the general result of the vaccine operations during that period, and shall submit the same through the Civil Surgeon to the Vice-President of the municipal committee, accompanied by a return showing—

(1) number of boys vaccinated during the month;

POLICE DEPARTMENT.

Proceedings of His Honour the Lieutenant-Governor of the Punjab in the Home (Police) Department, No. C. 95 S., dated the 3rd September 1909.

READ—

Punjab Chief Court Judgment in Case No. 570 of 1908. (Appeal from the order of the Sessions Judge of the Ráwalpindi division, convicting the appellant—Mussammat Gulab Bano—Appellant, *versus* the King Emperor—Respondent: Charge under Section 302, Indian Penal Code).

REMARKS.—A woman named Gulab Bano, who was prosecuted for the murder of her husband and convicted and sentenced to death by the Sessions Judge, was, on appeal to the Chief Court, acquitted. The Hon'ble Judges stated in their judgment that, upon the materials before them, there was grave reason to suspect that certain allegations made by Gulab Bano of ill-treatment of a most revolting character at the hands of the police, in order to the extortion of a confession, were not without foundation; and they suggested that a searching enquiry should be instituted. The Lieutenant-Governor having examined the records of a local enquiry which was held under the orders of the District Magistrate of Attock when the woman first made her allegations, and also the special reports which were called for on the appearance of the Chief Court judgment, has arrived at the conclusions which are set forth in the following paragraphs of this Resolution.

2. On the 7th May 1908, at the village of Chura in the jurisdiction of police station Chauntra in the Attock district, one Muhammad died under circumstances indicating arsenical poisoning. Enquiries were immediately instituted, and Muhammad's body was sent for *post-mortem* examination. During the investigation on the 7th and 8th May, Gulab Bano, Muhammad's wife, made a statement to the police implicating herself. Notwithstanding this statement, or confession, the woman was not detained in custody, the police did not consider that they were warranted in detaining her; there was at the time no proof that the deceased had died by poison, and the woman declared

that he had been ill for some days before he died, and that her daughter had died of vomiting and purging fourteen days before, so that the death might well have been due to natural causes; the autopsy report had not been received and the Chemical Examiner's report was not expected for some time. Mussammat Gulab Bano was accordingly released on bail on the 8th May.

3. On the 19th May the Chemical Examiner's report to the effect that arsenic had been found in Muhammad's viscera was received at Chauntra, and a police officer was deputed to arrest Gulab Bano. The woman was brought to Chauntra on the 21st May, sent in to the head-quarters of the district (Campbellpur) on the 22nd, produced before the Magistrate on the 23rd, and sent to the ward for the detention of under-trial prisoners in the jail the same day. Here she was seen by the Hospital Assistant on admission and by the Superintendent of the Jail (the Civil Surgeon) on the 25th, and was found to be in good health. She was taken out of the jail on the 29th May and placed before the Magistrate, to whom she made a statement to the effect that she had, at the instigation of one Nawab, alleged to be her paramour, administered to her husband a substance which she understood was a charmed salt that would prevent her husband from standing in the way of her intimacy with Nawab and would cause him to divorce her. She was then sent back to jail. Next day, the 30th May, she was again brought before the Magistrate and sent back to jail in the evening. On the 3rd June she was taken out of the jail and sent to Hassan Abdál, where the Magistrate's order was to be announced. She arrived there at 6 P. M. the same day, and was lodged in the females' lock-up at the police station. Next day, the 4th, at 2 P.M., she was taken to a place called Panja Sahib, where the Magistrate was holding his court, and brought before him; but as he had not time that day to announce his order, she was again brought before him at 8 A. M. on the 5th, when he passed orders committing her to the Sessions. She left Hassan Abdál that day at noon for head-quarters, where she arrived at 3-40 P. M., and was admitted into jail about 4 P.M.

4. On admission to jail on the 5th June Gulab Bano complained of diarrhœa, and was visited by the Hospital Assistant, who, considering that she was suffering from dysentery, admitted her to Hospital and began suitable treatment. On the evening of the 7th June she complained to the Matron of the jail that the police had maltreated her. The Hospital Assistant was summoned, and to him Gulab Bano made a statement to the effect that (in the words of the Hospital Assistant) "I was hung to the roof by the police (*i.e.*, Thanadar and two Head Constables) in my village during the investigation with a rope in my legs and a baton smeared with green chillies was thrusted up my anal opening." The matter was reported next day, the 8th June, to the Civil Surgeon, who examined the woman and found that she was suffering from fever and was in a weak state. He ordered her to be prepared for rectal examination, and next morning, the 9th June, examined her rectum which he found, to use his own words, "terribly inflamed and ulcerated, a condition which in my opinion could only have been caused by an assault similar to that described by the prisoner." On the same day the Civil Surgeon reported the matter to the District Magistrate, and on the following day, the 10th June, an enquiry was held by the District Judge, who recorded the statements of Gulab Bano and the Civil Surgeon. Written statements were put in by the Hospital Assistant, Matron, Jailor, Assistant Jailor and a female prisoner named Sahiba. Gulab Bano's statement to the District Judge was very clear and detailed: it was to the effect that on the fifth day of the investigation (*i.e.*, the 12th May) at about 8 A. M., the Thanadar and a Head Constable of the Chauntra police station and the Head Constable of the Chukri police post came to a *kotha* (small house), where she had been kept in confinement, and, with the object of making her confess, beat and kicked her and then tied a rope round her feet and suspended her from a rafter of the roof. Sikandar, her husband's brother, and Mawaz, her husband's uncle, were also, she said, present. A police baton, smeared with red pepper, was then thrust into her rectum. She described minutely how the red pepper was ground, mixed with

water and applied to the baton, and what part each of the persons concerned took in the proceedings. She also described her journey to Hassan Abdál and back, but made no allegation of ill-treatment during this journey. The only reason the woman gave for not having complained for nearly a month was that she was afraid. The jail officials state that Gulab Bano was in good health when admitted to jail, and that she made no complaint of any kind until the 5th June, when she complained of diarrhœa, and the 7th June, when she told the Matron she had been tortured. Sahiba, the female prisoner who made a statement and with whom Gulab Bano spent one night, the 2nd of June, said that when the latter sat down she rolled up some clothing to sit upon.

5. Some correspondence passed between the Superintendent of Police and the Civil Surgeon which disclosed certain improbabilities in Gulab Bano's statement. The papers then went to the District Magistrate, who forwarded them to the Civil Surgeon with an order to the effect that the matter called for departmental enquiry, as the woman could not have received her injuries while in police custody, and had probably received them in the jail. In response to this the Civil Surgeon made out a written statement which appears in original on the judicial file. In this statement, after alluding to enquiries made by himself and the Superintendent of Police, the Civil Surgeon says that in his opinion Gulab Bano's injuries might have been caused by the insertion of a mechanical body, or an irritant, or a combination of both; that it was possible that they were caused on the 12th of May, but that most probably they were caused between the 2nd and 5th June, that is, during the time the woman was away from the jail. The matter was not further pursued, as the case was going before the Sessions Court, where it could be judicially decided. Moreover, the woman stated that she had no witnesses who would attest her statement, and materials for further investigation did not therefore exist.

6. The date of the injuries to Gulab Bano is of the greatest importance. The Civil Surgeon says that it is possible but improbable that they could have been inflicted on the 12th May; and if the woman's statement is true she received them on or about that date. But if an outrage was committed in the brutal manner described by the woman, it is inconceivable that no rupture would have been caused, and it is inconceivable that inflammation and other complications would have remained latent for nearly a month; yet Gulab Bano was in good health up to the 5th June, having walked on one occasion 12 miles in a day and on another 20 miles in a day prior to her admission to jail on the 23rd May. That no laceration of the tissues was present was established by the medical examination. Gulab Bano's complaint was recorded by the Magistrate at the local enquiry on the 10th June. According to the Chief Court judgment, she was not then in a condition to give a lucid and accurate account of what had occurred, and in the Hon'ble Judges' opinion may have made a mistake as to the date of the alleged outrage, having been, according to the statement of the Civil Surgeon, in a very bad state only a fews days previously, *i.e.*, admitted to jail in a state of collapse on the 5th June. The judgment concludes:—"Our suspicions regarding the truth of the charge against the woman are certainly not removed by what occurred to her during the time that she was in the hands of the police between the 29th May and the 5th June." But it must be pointed out that the woman's statement to the District Judge was peculiarly clear and detailed and that she repeated the statement before the Sessions Judge on the 2nd September 1908 and definitely then stated that the alleged torture occurred five days after her husband's death. If, however, the woman did make a mistake about the date on which her injuries were received, and if it be assumed that she did, in fact, receive them between the 29th May and 5th June, the difficulties of the case will not have been removed by this assumption: there is another mistake to explain away—the mistake about the place. In her statement before the Sessions Judge—and on this occasion there is no suggestion that she was not in a fit condition to make a lucid statement—the woman said the outrage took place at the house of Hayat in her village on the 5th day after her

husband's death. If it took place between the 29th May and 5th June it could not have taken place at the house of Hayat in her village, for the very good reason that between the dates named she is conclusively shown to have been elsewhere. It is impossible therefore to give credence to a version of the story which, although it adjusts the date of the outrage to the probabilities indicated by the medical evidence, does so only by involving in complete discredit the story as a whole; for this version necessitates the rejection, as fabricated, of the full, detailed and reiterated account of the proceedings in Hayat's house. It is equally impossible to treat the latter account as credible in view of the facts pointing to Gulab Bano's being in good health prior to 5th June and having performed journeys on foot which no woman suffering from inflammation of the rectum could perform. In this view the Lieutenant-Governor is supported by the best medical evidence obtainable in the province: the opinions on the case of the Professor of Medical Jurisprudence for the Punjab is annexed. With reference to this opinion Colonel Bate, C.I.E., Inspector-General of Civil Hospitals, who has also been consulted, states:—"I concur in the opinion given by Colonel Cunningham. An assault of the nature stated by Mussammat Gulab Bano must have produced symptoms that could not have escaped observation on her admission to jail on the 23rd May."

7 In considering the probabilities of the police torture theory it is important to note the date of the confession before the Magistrate, *viz.*, 29th May. A confession to the police not followed by its reiteration before the Magistrate is, for prosecution purposes, useless No confession in the initial proceedings up to the time of the woman's release on bail, was recorded by any Magistrate; and the theory that torture was inflicted at this stage to extract the confession made some weeks later, the woman having in the meantime been out on bail, is innately most improbable. On the 23rd May Gulab Bano was, on rearrest, admitted to jail in good health, and between that date and the 29th when she made her confession, she was not in police custody, except while being conducted from the Campbellpur Jail to the Cutcherry, a short distance off. That she could have been maltreated in the way described on either this date or the 30th, between the jail and the court, is practically impossible, or at least so improbable that the idea may be dismissed at once. The foregoing remarks relate to the period up to the 29th May, when she finally confessed to the Magistrate. During this period there might have been some motive for the alleged outrage. After the confession no such motive existed, and although from the 3rd to the 5th June, when Gulab Bano was on her way to Hassan Abdál and back, she was in police custody, that fact alone, in the absence of motive for torture, is not significant. On this occasion she was either in the custody of two Constables from the Campbellpur police lines,—one a Hindu, the other a Muhammadan,—or was in the lock-up at Hassan Abdál. Neither of the Constables had anything whatever to do with the enquiry; the Hassan Abdál police had no interest in the case; there is evidence that no policeman from Chauntra, where the police enquiry was held, came to Hassan Abdál while Gulab Bano was there; and, as already noted, any possible motive there might have been for influencing the woman had disappeared, as she was only being taken before the Magistrate to hear his final order.

8. Having regard to all the foregoing considerations, Sir Louis Dane is unable to arrive at any other conclusion than that Gulab Bano's injuries were not inflicted by the police. Whether they were received in jail or when she was being taken before the Court on different dates between 29th May and 5th June and if so, how they were caused must remain a matter of conjecture. With the greatest respect for the opinion of the Hon'ble Judges, who apparently inclined to the view that the woman was tortured by the police between the 29th May and 5th June, the Lieutenant-Governor believes, with the Professor of Forensic Medicine, that an irritant was probably applied by the woman herself, or by some person with the woman's consent, in order to support a charge against the police

and to introduce into the case the feature which is notoriously so damaging to the prosecution —a retracted confession. No doubt opportunities occurred during the period between 29th May and 5th June for suggestions to this effect to be made to the woman, with a view to neutralising the effect of her confession of 29th May, and for her to adopt these suggestions. Instances of such tactics are by no means uncommon, and no other theory will satisfactorily explain all the facts. Such was the verdict of the three Indian Assessors who assisted at the Sessions trial. We are not warranted in denying to that verdict the weight which attaches, and rightly attaches, to the opinion of Mussammat Gulab Bano's countrymen, well acquainted with the conditions and customs of the people and the locality to which the parties in the case belong. Their opinions had no uncertain sound. Unanimously they declared :—" The case for the prosecution is true. The accused wilfully poisoned her husband in order to marry Nawab. The whole story of the police ill-treatment is the concoction of a cunning woman." The Judge (the late Mr. Kennedy, an officer of wide experience and a rigid censor of police procedure), agreeing with the Assessors, described the torture story as "a clumsy concoction." At any rate the torturing could not have occurred on 12th May in the manner and at the place and the time stated by the woman, as the expert medical evidence clearly shows. Between the 29th May and 5th June the police concerned with the prosecution were not near the woman at all and there was no object for the infliction of any such torture after 29th May, when the woman alleged before the Magistrate that she had merely administered a charmed salt to her husband to induce him to divorce her. There is moreover absolutely no corroboration of the theory that the alleged outrage occurred between these dates, and the theory is at direct variance with the reiterated statements of the woman herself and is rendered highly improbable, if not impossible, by the history of the woman's movements during those days. It would be impossible on a mere theory of this kind to launch any case against the police concerned, whose proceedings appear to the Lieutenant-Governor not to have been open to any such charge. He regrets that no local police officer was present during the hearing of the appeal, as such an officer might have been able, through the Government Advocate, to have indicated the points which discredited the theory propounded in the Chief Court.

9. Besides the question of the charge of torture there is one other point in the case which His Honour considers should not pass unnoticed. The Chief Court judgment lays great stress on what is described as the suppression by the prosecution of a certain piece of evidence favourable to the accused. It is said that the matter vomited and purged by the murdered man was carefully preserved by the accused and at once pointed out by her to the police on their arrival, and that this fact was suppressed by the prosecution. What happened was this. Muhammad, the murdered man, purged and vomited on the floor of the house. The vomit was, Gulab Bano said, scraped up by her and thrown part into a rubbish pit and part on to a heap of sweepings. But no mention of this was made to the police officer who first arrived upon the scene, the Head Constable from the Chukri police post. It was only when Head Constable Abdulla, from police station Chauntra, arrived and questioned the woman that she stated what she had done. The matter to which attention was thus drawn by the woman was forwarded to the Chemical Examiner, but no poison was found in it. The woman's statement that this matter was what she represented it to be was probably untrue. Muhammad admittedly died of arsenical poisoning, and had the matter pointed out by the accused really been his vomit, ejected when under the influence of the poison, it would have yielded traces of arsenic. In any case, the evidence being of no value was not brought forward. Had it been produced it would probably have told against and not in favour of the accused, as suggesting an attempt on her part to baffle the investigation. All the facts were set forth in the police papers, which were produced before the Sessions Court and the Chief Court, and no attempt was made to conceal them. In His

Honour's opinion, therefore, the prosecution were not guilty of suppressing evidence, a charge which, it may be observed, falls upon the heads of the European Superintendent of Police and the Public Prosecutor.

10. As this case has attracted considerable notice in the Press in India and has several times formed the subject of questions in the House of Commons, the Lieutenant-Governor has deemed it desirable to give publicity to the conclusions at which he has arrived as the result of the investigation made under his orders.

By order of His Honour the Lieutenant-Governor,

M. W. FENTON,

Offg. Chief Secretary to Government, Punjab.

Opinion of Lieutenant-Colonel J. A. CUNNINGHAM, I.M.S., Professor of Medical Jurisprudence, Lahore Medical College,—dated the 27th August 1909.

I HAVE gone through this case, and with regard to the medical aspects of it I would remark as follows :—

The woman Gulab Bano was apparently in good health on admission to jail on 23rd May, and remained so up to the 2nd or 3rd June, making no complaint and appearing well. On the 3rd June she was taken by the police to Hassan Abdál, to appear before a court, returning to the jail on the 5th June about 4 P.M. On arrival at the jail she was observed by the jailor to be very ill, almost collapsed. She was made over to the Hospital Assistant, who found her suffering from symptoms resembling dysentery, for which he treated her. She appears to have been passing mucus and blood. After her re-admission to jail on or about the 7th June Mussammat Gulab Bano, while suffering as above described, brought to notice that the police had outrageously assaulted her on the 12th May by suspending her head downwards and thrusting a police baton smeared with red pepper into her rectum. She apparently wished it to be believed that her present illness resulted from that assault or torture, there being no contention of a repetition of the torture meantime.

On the 9th June Major More, after preparing the patient, made an examination of the rectum, which he found " terribly inflamed and ulcerated." In one statement on the record he says that " his opinion is that the condition could only have been caused by an assault similar to that described by the prisoner." In another place he says " my opinion was that some irritant had been inserted into the rectum and had caused acute inflammation. From the appearance it seemed to have been caused within two or three days. It is possible but improbable that the injury was caused about 12th May." Itis on record that Gulab Bano walked long marches of 12 and 20 miles subsequent to the 12th May without either complaining or appearing to suffer, also that she remained apparently well up to, at all events, the 3rd June.

To my mind this state of affairs precludes the possibility of her condition on the 5th and 9th June being due to the alleged torture on 12th May. I cannot conceive a condition of inflammation of the rectum with a state of severe illness and collapse, with passage of blood and mucus on or about the 5th and 9th June, resulting from the violent introduction of a foreign body smeared with an irritant into the rectum on 12th May, the person remaining apparently well meantime, taking ordinary food, and even walking long marches. I do not agree with Major More that inflammation resulting from such an assault could remain latent for nearly a month and then light up, giving the appearance of having been caused two or three days before.

With some hesitation (not having seen the patient) I express the opinion that the condition found by Major More at his examination on 9th June, together with the symptoms described, might well be the result of an acute attack of dysentery, which very probably may have been accelerated by the local application of some irritant, such as red pepper, by the accused herself. Chillies are always at hand and easy to find about a jail ; they are grown in the garden, and used daily in the dietary of the prisoners. They are often secreted by prisoners and warders, and used for barter, &c.

GENERAL.

The 15th September 1909.

No. 1380.—*Notificaction.*—The following is republished for general information :—

Extract from the Proceedings of the Government of India in the Home Department (Public), No. 2831-42, dated 8th December 1899.

The Secretary of State for India has brought to the notice of the Government of India that it not infrequently happens that natives of India, students or others, who have proceeded to England, desire to obtain passports to enable them to travel to foreign countries in which the possession of a passport is necessary or desirable, and that difficulty often arises from want of evidence to show that the applicant is a British subject and therefore entitled to a passport. Appeals for assistance are also frequently addressed to His Lordship by destitute Indians, who desire to return to their country and by students who, owing to embarrassed circumstances, are unable to complete their course of education.

2. In order to enable the Secretary of State to deal with such cases satisfactorily the Governor-General in Council has decided that it is necessary to press upon Indian students and others visiting England the desirability of providing themselves, before their departure from India, with an authoritative certificate of identity, in the form appended to this resolution, signed by the head of the district (in a Presidency Town the Commissioner of Police) in the case of residents of British India and by the Political Officer in that of residents of Native States. For a student the certificate should be signed by the head of his last school or College and countersigned by the District Officer (in a Presidency Town, the Commissioner of Police) or Political Officer, as the case may be.

MEDICAL AND SANITARY.

The 2nd November 1909.

No. 834.—*Notification.*—The following rules for the regulation of vaccine operations in the municipality of Bahádurgarh in the Rohtak district, framed under section 19 of Act XIII of 1880 by the municipal committee of Bahádurgarh at a special meeting, have been confirmed by His Honour the Lieutenant-Governor, and are published for general information. They will come into force six weeks from the date of the publication of this notification :—

RULES.

1. The municipal committee shall, from time to time, appoint public vaccine stations for the municipality at such places as the Civil Surgeon may, in consultation with the committee, approve, and shall similarly fix the days and hours at which such stations shall be open, and shall cause to be affixed on the outside of every such place in a conspicuous position a signboard on which shall be printed in letters easily legible, and in English, Urdu and Nagri characters, the following inscription:—

Bahádurgarh Municipal Vaccine Station

Open (day) from (hour) to (hour),

and these stations shall be numbered and known as No. 1, No. 2, and so on, respectively.

2. For each public vaccine station the municipal committee shall appoint one public vaccinator. Every such public vaccinator shall ordinarily wear a distinguishing badge consisting of a red cross on a white ground, and this shall be worn on the breast.

3. No person shall be appointed a public vaccinator unless he has obtained a certificate from the Sanitary Commissioner of the Punjab that he is duly qualified to perform vaccination as prescribed by Act XIII of 1880.

4. The appointment, suspension and dismissal of every Superintendent of Vaccination and public vaccinator employed within the limits of the municipality shall rest with the municipality, subject in the case of those who are entitled to pension from provincial revenues to the approval of the Sanitary Commissioner, Punjab.

5. The vaccination season will extend from 1st November to 31st March.

Note for vaccinators.—Although the Vaccination Act does not render liable to punishment the omission to get children under age of six months vaccinated, yet it is very desirable that children should be vaccinated at an earlier age. As a rule, all healthy unprotected children over one month old presented for vaccination should be vaccinated by the public vaccinator.

6. During the vaccination season each public vaccinator shall be bound to attend at the vaccine station to which he may be attached by the Civil Surgeon on the days and at the hours fixed for such station, and he shall reside in the municipality.

7. The lymph to be used in the performance of vaccination shall be pure lymph obtained on the fifth day taken from the udder or from the soft skin in the neighbourhood of the udder of a buffalo calf under the age of one year which is free from contagious disease, and has perfect full sized vesicles, or vaccine paste prepared from the buffalo calves at the recognized provincial vaccine depôts.

8. If the parent or guardian of a child produced for vaccination desires that human lymph should be used, the vaccinator shall comply, and the lymph shall be taken from a child, subject to its parent's or guardian's consent, that has two perfect vesicles left untouched on the arm to run their regular course.

9. Not more than two children shall be vaccinated from each full sized vesicle opened for the purpose of extraction of lymph, and not more than 60 children from a single buffalo calf or six children from a single child.

10. Persons desirous of procuring the vaccination of their children at their own houses shall intimate the fact to one of the public vaccinators who, out of the hours of his public duties, shall arrange with the applicant to vaccinate the child. A fee of Re. 0-8-0 shall be payable to a public vaccinator who so vaccinates a child elsewhere than in the station for which such vaccinator is appointed.

11. Persons licensed by the Local Government to act as private vaccinators shall in no case demand a higher fee than one rupee for a single operation, and shall perform their duties under the orders and subject to the general control of the Civil Surgeon.

12. If the result of the first vaccination is a failure, the child should be re-vaccinated. If the second operation is also a failure, a third attempt should be made. If this also is unsuccessful, it is needless to repeat it again.

13. Whenever it is ascertained that a child is unfit for vaccination or is insusceptible of successful vaccination, a certificate in form A attached to these rules shall be granted in the former case to the parent or guardian of such child by the vaccinator, and in the latter in the form B by the Civil Surgeon or other Medical Officer in charge of the local dispensary. In like manner, whenever it is ascertained that a child has been successfully vaccinated, a certificate shall be granted by the vaccinator to the parent or guardian of such child in the form C attached to these rules.

14. The following registers shall be kept up by the municipal committee:—

(A) A register showing the names of children born within the local area subject to these rules on and after the date of the application of Act XIII of 1880 to such area.

(B) A register showing the names of unprotected children born in the area aforesaid previous to the date of the application of Act XIII of 1880, and who were at that date under the age of 14 years if boys and of 8 years if girls.

(C) A register showing the names of unprotected boys and girls, respectively, under these ages brought within the local area aforesaid at any time after the application of Act XIII of 1880, and who had resided there for a month.

(D) A register showing the result of each vaccination or its postponement, and the delivery of certificates, if any.

15. The preparation of Register (A) shall be effected from the register of births maintained in the municipal office, of Registers (B) and (C) from the information to be collected under the orders of the President of the municipal committee, and of Register (D) from the report submitted by the vaccinator as hereinafter prescribed.

16. Every public and private vaccinator employed within the local area to which these rules apply shall keep up the following registers, namely :—

(1) Name, sex, age, parentage, caste and residence of each child vaccinated.

(2) Date of operation.

The rules referred to are hereinafter called the Government of India rules.

III.—(*i*) With reference to rule 9 of the Government of India rules, the supply of stamps of each denomination to be maintained at each of the local depôts at Lahore, Delhi, Multán and Káwalpindi shall ordinarily be not less than the probable consumption of six nor more than the probable consumption of twelve months. In the case of every other local depôt the supply to be maintained shall ordinarily be not less than the probable consumption of six nor more than the probable consumption of nine months.

(*ii*) With reference to rule 10 of the Government of India rules, as soon as the number of stamps of any denomination in any local depôt approaches the minimum ordinary supply set forth in sub-clause III (*i*) above, an indent for a quantity which, with the balance in hand, shall make up the maximum ordinary supply, shall be forwarded by the officer in charge of the local depôt through the office of the Superintendent of Stamps, Punjab, to the Superintendent of Stamps, Karáchi.

(*iii*) With reference to rule 32 of the Government of India rules the supply of stamps of each denomination to be kept in a branch depôt shall ordinarily be not less than the probable consumption of one, nor more than the probable consumption of two, months.

(*iv*) With reference to rule 33 of the Government of India rules, as soon as the number of stamps of any denomination in any branch depôt approaches the minimum ordinary supply (see sub-clause III (*iii*)) an indent for a quantity which, with the balance in hand, shall make up the maximum ordinary supply set forth in the said sub-clause shall be forwarded by the officer in charge of the branch depôt to the officer in charge of the local depôt.

(*v*) With reference to rules 12 and 13 of the Government of India rules, as soon as possible after the arrival at a local depôt of a supply of stamps, the officer in charge of the local depôt shall have every box or package opened in his presence, and the contents of each box or package shall forthwith be counted by himself, or in his presence. He shall compare the number, description and value of the stamps received, with the entries in the invoice. The inside wrappers of packets of stamps which bear the initials of the officers through whose hands the packets passed before issue from England should invariably be preserved until the whole contents of the packets have been examined and found correct. If the stamps received be found to correspond with the invoice, the officer in charge of the depôt shall date and sign the invoice, and return it not later than seven days after the arrival of the stamps to the officer from whom the *invoice* has been received. If any discrepancy be found, he shall forthwith inform that officer and also the Superintendent of Stamps, Punjab, of the nature and extent of the discrepancy.

If the supply of stamps received is large, instead of opening and counting the contents of every packet marked as containing a certain number of stamps, all of one denomination and having intact the seal of the office from which the stamps were issued in England, the officer in charge of the depôt may open and count the contents of not less than ten per cent. of such sealed packets. If they are found correct, he should sign and return the invoice, or if any discrepancy is discovered, take action as prescribed above. The remainder, if the contents of those packets which have been opened are found correct, may be deposited with seals unbroken under double locks, and their contents may be verified when they require to be opened for the purpose of the issue of stamps from double locks.

The officer shall, in returning the stamps, forward a report of the circumstances in which the stamps are believed to have been rendered unfit for issue, and he shall, at the same time, submit a copy of the report to the Superintendent of Stamps, Punjab.

(*vii*) Sub-clauses (*v*) and (*vi*) of this clause shall apply *mutatis mutandis* to branch depôts (see rule 31 of the Government of India rules).

(*d*) any matter under adjudication by a Court of Law having jurisdiction in any part of His Majesty's Dominions.

Resolutions.

4. Subject to the restrictions contained in rule 3, any Member may move a resolution relating to a matter of general public interest:

Provided that no resolution shall be moved which does not comply with the following conditions, namely:—

(*a*) it shall be in the form of a specific recommendation addressed to the Lieutenant-Governor;

(*b*) it shall be clearly and precisely expressed, and shall raise a definite issue;

(*c*) it shall not contain arguments, inferences, ironical expressions or defamatory statements, nor shall it refer to the conduct or character of persons except in their official or public capacity.

5. A Member who wishes to move a resolution, shall give notice in writing to the Secretary at least fifteen clear days before the meeting of the Council at which he desires to move the same, and shall together with the notice submit a copy of the resolution which he wishes to move:

Provided that the President may allow a resolution to be moved with shorter notice than fifteen days, and may, in any case, require longer notice or may extend the time for moving the resolution.

6. (1) The Secretary shall submit every resolution of which notice has been given to him in accordance with rule 5 to the President, who may either admit it or, when any resolution is not framed in accordance with rule 4, cause it to be returned to the Member concerned for the purpose of amendment.

(2) If the Member does not, within such time as the President may fix in this behalf, resubmit the resolution duly amended, the resolution shall be deemed to have been withdrawn.

7. The President may disallow any resolution or part of a resolution without giving any reason therefor other than that in his opinion it cannot be moved consistently with the public interests or that it should be moved in the Legislative Council of another Local Government or of the Governor-General.

8. (1) No discussion in Council shall be permitted in respect of any order of the President under rule 6 or rule 7.

(2) A resolution that has been disallowed shall not be entered in the proceedings of the Council.

10. The discussion of resolutions shall take place after all the other business of the day has been concluded.

11. (1) After the Mover of a resolution has spoken, other Members may speak to the motion in such order as the President may direct, and thereafter the Mover may speak once by way of reply. [Cf. Leg. Rules, India, 9.]

(2) No Member other than the Mover and the Member in charge shall speak more than once to any motion, except with the permission of the President, for the purpose of making an explanation.

Any such spech may at the discretion of the President be taken as read.

15. The discussion of a resolution shall be limited to the subject of the resolution, and shall not extend to any matter as to which a resolution may not be moved.

16. When a resolution is under discussion any Member may, subject to all the conditions and restrictions relating to resolutions specified in rules 3 and 4, move an amendment to such resolution : [Leg. Rules, India, 28, Leg. Rules, Beng., 25, 2nd para.]

Provided that an amendment may not be moved which has merely the effect of a negative vote.

17. (1) If a copy of such amendment has not been sent to the Secretary at least three clear days before the day fixed for the discussion of the resolution, any Member may object to the moving of the amendment; and such objection shall prevail unless the President, in exercise of his power to suspend any of these rules, allows the amendment to be moved. [Leg. Rules, India, 29.]

(2) The Secretary shall, if time permits, cause every amendment to be printed and send a copy for the information of each Member.

[Leg. Rules, Beng., 24.] 18. A Member who has moved a resolution or an amendment of a resolution may withdraw the same unless some Member desires that it be put to the vote.

19. When, in the opinion of the President, a resolution and any amendment thereto have been sufficiently discussed, he may close the discussion by calling upon the Mover to reply and the Member in charge to submit any final observations which he may wish to make:

Provided that the President may in all cases address the Council before putting the question to the vote.

[Leg. Rules, Beng., 25.] 20. (2) It shall be in the discretion of the President to put first to the vote either the original motion or any of the amendments which may have been brought forward.

[Leg. Rules, Beng., 26.] 21. If any resolution involves many points, the President at his discretion may divide it, so that each point may be determined separately.

[Leg. Rules, Beng., 16.] 22. (1) Every question shall be resolved in the affirmative or in the negative according to the majority of votes.

(2) Votes may be taken by voices or by division, and shall be taken by division if any Member so desires.

(3) The President shall determine the method of taking votes by division.

General.

23. The President may assign such time as with due regard to the public interest he may consider reasonable for the discussion of resolutions or of any particular resolution; every resolution which shall not have been put to the vote within the time so assigned shall be considered to have been withdrawn.

24. Every resolution, if carried, shall have effect only as a recommendation to the Lieutenant-Governor.

25. When a question has been discussed at a meeting of the Council or when a resolution has been disallowed under rule 7 or withdrawn under rule 18 no resolution or amendment raising substantially the same question shall be moved within one year.

[Leg. Rules, Beng.] 26. (1) The President shall preserve order, and all points of order shall be decided by him.

Burt, C.I.E., then proceeded to the Dais, followed by their personal staff and the remaining members of the reception committee.

The General Secretary having read a report on the origin and organisation of the Exhibition, the President addressed the assembly in English and

invited His Honour the Lieutenant-Governor to open the Exhibition. Maulvi Haji Rahim Bakhsh, C.I.E., also addressed the assembly in Urdu.

The donors of Rs. 500 and upwards to the Exhibition funds, the Patrons excepted, were presented to His Honour the Lieutenant-Governor.

His Honour the Lieutenant-Governor then addressed the assembly as follows :—

" PRINCES AND CHIEFS, LADIES AND GENTLEMEN,—

" I AM glad to find that so many patrons have thought it right and proper to accept the invitation of Sir P. C. Chatterjee and the General Committee to be present at the opening of this Exhibition of the Industries and Agriculture of the Punjab, North-West Frontier Province and Kashmir. I am aware that there were doubts on both sides whether or not it was desirable that in existing circumstances the Government and its officers and the Princes of the States in and adjoining this Province should be closely associated with an Exhibition which was intended to be and is a popular instance of self-government. The stalwarts of the cause of self-government thought that the assistance of Government would swamp their venture, and the ultra-conservatives doubted if the cause of self-government should receive the mark of princely and official approval. Gentlemen, I am proud to think that the moderate men on both sides have ignored these doubts and difficulties, and that we were willing and able to comply with the invitations for help and assistance which we receive from the Governing Body of the Exhibition, and that, thanks to the cordial co-operation of the States and Government officers with the people of the Punjab, the enterprise has been brought to a successful result in a wonderfully short time. I draw from this a happy augury. For good or evil we are embarked on a career of co-operation in administration. I believe that that co-operation will work for good, and I hail this instance of such co-operation as a foretaste of what this Province may achieve under its new Council which is now in process of construction and which will, I trust, come into full operative life before this Exhibition closes.

" Besides, when a body of gentlemen numbering many of our leading citizens, of whose loyalty and good will there can be no doubt, however they may differ as to the best methods of government of this country, requested us to help them in displaying the Industrial and Agricultural resources of the country to the best advantage, it would have been little short of a public scandal if the servants of the public engaged on the task of administering the country had turned a deaf ear. It is possible that if the time had been longer and if the trained hands of Government officers had controlled the whole arrangements, larger funds might have been collected and there might have been a more imposing show. But I do not think that we need be in the least ashamed of this collection displaying the resources of the Punjab with its daughter province of the North-West Frontier and its sister frontier State of Kashmir, whose enlightened ruler, His Highness the Maharaja, is happily present here to-day as a mark of the interest which he takes in the development of his State, and I take it upon me, in the name of the countries here represented, to thank Sir P. C. Chatterjee and Mr. Har Kishan Lal and the Members of the General Committee and the Sub-Committees and Secretaries for their whole-hearted and most successful labours in the interests of self-government and of the good of the country.

"At any rate, they need not fear comparison with the past. There have been three previous Exhibitions in the Punjab, in 1864, 1881 and 1893; so the time had certainly come round for a fourth. The first Exhibition was housed in what is now the Municipal Market in Anárkali and was a general exhibition much on the present lines. It was very useful and led to the publication of Mr. Baden Powell's "Punjab Products". But what a change there has been. Now it has been difficult to meet the demands for space even with all these commodious buildings and tents and the great open areas round them. Then all was contained in one small erection which is now much too small for the market-place of the Civil Station of Lahore and Anárkali.

"The Exhibition of 1881 was managed by Mr. Lockwood Kipling, to whom art in the Punjab owes so much, and was a display of the industrial arts of the Province. The School of Art building, with a few tents, was sufficient to contain all that there was then to show. The results were most marked upon the arts and crafts of the Province, and the Exhibition led directly to the construction of our Museum, of which the foundation stone was laid by His Royal Highness the late Duke of Clarence in 1890. The Museum, with the adjacent School of Art under Sardar Bahadur Bhai Ram Singh, is one of our finest buildings, and contains a collection of which any capital may be proud. Our Græco-Bactrian remains and coins are world famous, and if our industrial section has not been as complete as it might have been, it is rapidly being brought up to date by the labours of Messrs. Wathen and Mouat Jones, and should with the collections from this Exhibition be a most complete and valuable object-school in technology and science for our College students as well as for the public. The building formed the home for the Exhibition of 1893, which, like that of 1881, was mainly a display of Art products and manufactures which served to show the progress which had been made during the previous twelve years.

"All these three Exhibitions were purely official, and the present display differs radically in that it is primarily and mainly the result of private enterprise, assisted by the Government officers who have to deal with the major industries of the Province, but still non-official entirely in its management and direction. It is therefore a most interesting experiment, and deserves all consideration at the hands of the public, on whose attendance it must depend both for its financial and for its educative success.

"Let us hope that the present Exhibition, like its predecessors, may lead to permanent results of public utility, and that these results may be as great in proportion as this Exhibition exceeds all former undertakings of the sort in the Punjab.

"Perhaps the most marked feature of our present display is that under the heads of Irrigation and Agriculture. It is right that such should be the case. Our motto is *Crescat e fluviis*, or May the Punjab grow by its rivers. Of course our Province, with the exception of the Salt Range tract, literally has grown by accretion from its rivers, but the rivers have not deserted their child. Thanks to the labours of the Irrigation Department, their natural exuberance has been trained and controlled until the whole power of the fertilising floods is devoted to the growth in wealth and prosperity of the Province and its peoples. I commend to your attention the Irrigation Exhibit, which shows at a glance how this control over the rivers has been secured and what use has been made of it. I cannot refrain, however, from giving you the

figures for the canal irrigation and crops raised by decennial periods since the present era of canal development began in the Punjab :—

"Such are the results. Canal irrigation has risen from 764,268 acres in 1864 to 6,749,607 acres with the amazing produce of 121 million maunds, of a value of 1,802 lakhs of rupees, in 1908. The gross, commanded area up to the end of March 1909 was 18½ million acres, of which 15½ million acres were culturable. The length of main channels and branches was 2,900 miles, or one-third of the diameter of the earth, and the distributaries aggregated 12,339 miles, or half the circumference of the globe. The total discharge of these canals amounted to 45,000 cubic feet per second. The average value of the produce at a cautious estimate of outturn was Rs. 27 per acre and Government took as water-rate Rs. 3-5-0. We hear a great deal of the wonders of Irrigation in Egypt, and they are no doubt great, though here again most of the greatest works are those constructed by Indian Engineers. But the total irrigated area in Egypt is only some 3½ million acres, or little more than half that of the Punjab.

"Of this Punjab irrigated area, about one-third is comprised within the limits of the great Canal Colonies on the Sidhnai, Chenab and Jhelum Canals. Other such colonies will arise in the not distant future in the emaining arid wastes of the Western Punjab. It must be remembered that the whole of the existing colonised area was pure waste and useless

save in good years for grazing. Now it serves to maintain in undreamed-of prosperity some million and-a-half colonists. The average value of the surplus agricultural products exported by rail from the Chenab Colony during the years 1905—1909, of which two were bad years when over one-fifth of the revenue was remitted, was Rs. 3,28,48,937, or Rs. 38 per acre and Rs. 19 per head of population. From the Jhelum Canal Rs. 27 per acre of surplus produce was exported. The land was worth perhaps 1 rupee an acre. Now it is valued at Rs. 150, and it lets at over 10 rupees an acre, while the lots for a new township on uncommanded land have just sold at Rs. 45,750 an acre.

"In this work Irrigation and Revenue officers have played both their part. Public-spirited and energetic Revenue officers like Colonel Grey have made their inundation canals in Bahawalpur and Ferozepore, and it was a Revenue officer, Sir J. Wilson, who first formed the idea of the great Triple Project now under construction. Civil officers see more of the country than Engineers, and I trust that in the future, as in the past, they will work with their eyes open and be ever ready to foster and push any scheme which may seem to lead to the well-being of the districts entrusted to their charge. They will find the Engineers only too ready to take up any sound idea, and such a combination is irresistible.

"We still have deserts to conquer, and when the great Triple Project is ready work can be started on the Bias- Sutlej scheme and finally on the great Sind-Sagar Canal. Then, as we have exhausted the natural snow-fed reservoir of the Himalaya and the demand for water and yet more water is still insistent, it may be possible to supplement the supply from the snows by storage reservoirs on the lines of that at Assouan, where the surplus rainfall can be held up and let out during the autumn months when the rivers are at their lowest and the demand is greatest. Sites for such reservoirs are being carefully examined, and it is hoped that as the demand increases, so we shall be able to meet it.

"Gentlemen, if we are asked what have we done for agriculture, we can confidently point to the splendid record of our Canals and Canal Colonies. It is a record of which any Government may be proud, and an achievement that no Government either in India or elsewhere has ever attempted on a similar scale. Happily, like charity, it is an achievement doubly blessed, as it has not only increased the revenues of Government, but has enriched hundreds of thousands of the brave and patient peasants of the Punjab whose well-being is and must be our chief care. We hear of great land schemes elsewhere and of fixity of tenure at a fair rent. It may surprise you to know that Mr. Gladstone got his idea of Irish land reform in this respect from the Punjab Tenancy Act of 1866, and in truth in other ways in this Province, with its agricultural wealth distributed over the whole body of peasant proprietors, and not locked up in the hands of middlemen, we have arrived at one of the ideals which modern social science sets before itself.

"The wealth of the Punjab community as a whole is very great. Annually some two and-a-half millions sterling are poured into the Punjab to move the wheat crop, as we grow 30 per cent. of the wheat of India. The exports of wheat from Karachi during the five months of the present year ending in August were worth eleven and-a-half crores of rupees. Our cotton output is a material and steadily growing feature of the total cotton yield of India, and I am glad to think that in this year of scarcity of cotton and abnormally high prices the crop has been a bumper one, both here and elsewhere in India generally. I need hardly say that it is not the case in the Punjab that we have merely turned one form of cultivation into another, not always to the benefit of the country. The total cultivated area of the Punjab and North-West Frontier Province in 1854 was under thirteen million acres. The figure for the Punjab alone is now over twenty-eight million acres. The share of produce which the State

claims as revenue, as measured in rupees, has been steadily reduced both by actual reduction of the pitch of the assessment and by the fall in the purchasing value of the rupee, and also by the more liberal system of suspensions and remissions which is now in force. In 1854 the landholder had to pay 40 seers of wheat per acre as revenue; in 1904 he paid only 19 seers per acre; and at present owing to a further rise in the price of wheat he cannot be paying more than 14 seers: so that after he has fed himself and his family the surplus produce available for his other wants, as well as the money value of this, has greatly increased,—a fact which those who argue that as prices and wages have risen the cultivator is not better off than he was before should always bear in mind. In the Punjab too our assessments have always been liberally lenient, and actually represent considerably less than $\frac{1}{10}$th of the gross produce, so that even that stern cirtic Mr. Romesh Chandar Datt, whose recent death we all deplore, would have acclaimed our principles and practice.

"An interesting note in the *Indian Agriculturist* of 1st November 1909, which is based on the statistics of the Agricultural Department, shows up clearly how prosperous the Punjab is at present, and brings out what one would hardly have expected, and that is the great increase which has taken place also in live-stock, and especially in cows and milch-buffaloes.

"But this is not all that has been done for agriculture. There is now a special department to deal with this all-important subject, and the great Agricultural College, with a fully-equipped scientific staff for teaching and research, has just been opened at Lyallpur. Their labours may give us better and more productive classes of wheat, cane and cotton, and show us the results of the application of chemical manures. If the experiments with nitrate of lime prove the success which they promise to be, a magnificent future opens before the Province. We have almost illimitable capacity for the production of this nitrate with our great water power, and with our fields producing wheat on the English proportion per acre, our agricultural prosperity would be secured for generations to come. The exhibits of the Agricultural Department are here, and you will be able to see for yourselves what they are doing. They have made a collection of the types of agricultural implements in use in different parts of India and of new and improved types which they have tested. Then there is a complete display of various classes of water-lifts. Opportunities exist for showing the agricultural machinery in operation, and I am certain that this will be one of the most valuable features of the Exhibition. There is also the great collection of up-to-date machinery of all types suited for different industries, which the enterprise of the firms concerned has brought together for inspection here. I hope that their enterprise will meet its due reward.

"Then there is the important question of wells. It has been shown that in the submontane districts, where canals are not desirable or even possible, true sub-artesian wells can be tapped over large areas. The experiments of the Irrigation Department at Rúpar, of Rai Bahadur Ganga Ram in Patiála, whose young Chief has done so much for the Exhibition and whom I welcome here to-day, and Gurmukh Singh at Ráwalpindi lead to the hope that much can be done by tapping deeper springs than those which the people themselves have reached. The Agricultural Department have started a well-boring staff, and, though this area forming part of a river bed is not altogether well adapted for the purpose, there are samples in the grounds of deep wells suitable both for irrigation and for a water-supply for towns. Visitors will be able to see all forms of water-lifts and pumps, electrical and others, in operation, and we hope to do much to mitigate the risk of swamping in low-lying tracts on canals by utilising the water power of the canal to pump up the water from the subsoil and either to irrigate with this locally or to carry it to the arid tracts further down the canal.

"While dealing with the wider aspects of agricultural improvement, the Punjab has not neglected the minor features of the industry. We all know the splendid fruit of Kashmír. The indigenous apples of the State go all over India. The Darbar have under French experts greatly improved the quality of the apples and pears, and as the people generally take to growing these improved varieties, we in the plains of India shall benefit. Then there is the great fruit industry in Kulu. In this I take a fatherly pride, as Lady Dane and myself were the first commercial travellers in Kulu fruit. The pioneers of the industry thought only of selling dried fruits owing to the remoteness of the tract. We felt sure that there was a future for the apples and pears, even at high prices, and took in the first consignment ever sold to Simla in 1882. It sold at once. For a few years the Assistant Commissioner of Kulu assisted the growers by establishing a coolie dâk, and now the fruit goes all over India and Burmah by post. There is a very large area suited for fruit culture of all kinds in Kulu and the adjacent Hill States, where the rainfall is not too heavy, and if ever the project for a cart-road or light railway *viâ* Bilaspur, Suket and Mandi can be successfully carried through, a considerable trade should spring up in the finer qualities of fruit, for which the market in India is practically unlimited. The Pusa researches may show us how to transport the perishable fruits like peaches and apricots, and these do admirably nearer home in the Salt Range. Measures are being taken to teach Forest Rangers fruit cultivation, so that we may employ to its fullest utility this agency and thereby do more to popularise the Department.

"I would invite attention to the interesting exhibits of the Forest Department in the shape of a resin still, a consignment of sleepers preserved by the Powell process, and a collection of ornamental and useful woods. The prime object of the Forest Department is to conserve the forests in the hills, and so preserve our water-supply and prevent dangerous denudation. This work they have well performed, though their duty is of necessity not always locally popular. At the same time they provide the timber so needed for railway construction and building. We hope to do more in this way. At present our soft woods, spruce and fir, are practically unused, as they cannot stand long water carriage. There are enormous areas under these soft wood forests, and the Department are now considering if we can devise means of working up the timber at suitable points near the forests and selling it ready for fixing. At present it is actually cheaper to use Norwegian deal in Dharmsála and Simla than country wood, as it is sent out ready planed and grooved for use. We ought to be able to put our local timber on the market at rates which would render this impossible. Then there is the question of wood pulp. The soft timbers in America are being largely used for this. The demand for paper is steadily increasing in India, and with electric power on the rivers there should be an opening of a great industry here. I hope that many years will not pass before an experiment is made.

"You will find interesting exhibits of the Agricultural Department by which it is hoped to interest people more in the cottage industries of bee-keeping and poultry rearing. Bees are kept now all through the hills, but they are reared in the old unscientific way which has been rejected in Europe, and the wax and honey are put on the market in a very unmarketable form. We hope to induce the people to try frame hives and more scientific methods, and to see if bees cannot be reared in other parts. The proper sort of bee exists in the Salt Range, and in all submontane districts bee-keeping should be possible, as in the very hot weather and rains the hives, as in England and Kulu, could be moved up to higher and cooler regions.

"For poultry in the Punjab there is a great market, and the conditions are quite suitable. With incubators a good stock can soon be reared, and the Department are securing good breeds from Europe as well as the excellent

variety from the Lolab valley in Kashmír, where the people are already to a great extent experts. Poultry farms will be started in Lahore and at Lyallpur, and I hope at Shahpur or Sakesar; and the Jhelum District Board have already imported birds of their own and the necessary machinery for an up-to-date poultry industry.

"Such cottage industries are most valuable as bringing grist to the family mill, and all classes can take to them and so provide useful and interesting work for those of the family who at present do little or nothing towards keeping the pot boiling.

"Fisheries cannot assume so prominent a position here as in Bengal and other provinces. But the subject has not been neglected. Here again Kashmír has led the way, and brown trout have been most successfully acclimatised there by the Director of Pisciculture, Mr. Frank Mitchell. The fish are now breeding there, and, thanks to the courtesy of the Darbar, they have been successfully introduced into the Bias in Kulu, and it is hoped to start the industry elsewhere wherever conditions allow the temperature of the water in the streams to sink to a sufficiently low point to admit of natural reproduction.

"The very interesting exhibit of scientific fish culture which the Fishery Department of Bengal under Mr. Ali Ahmad has kindly sent up deserves close study. The Department was started by Mr. Krishna Govinda Gupta, who has honoured us by his presence here to-day. I am sure that at any rate this is the first Exhibition in India which has been so honoured by the presence of a Member of the Council of the Secretary of State. We have not the numerous perennial streams and tanks which exist in Bengal, and the intermittent flow of our canals and rivers militates against a great fisheries industry. But it ought to be possible to provide suitable shallow reservoirs in or alongside our canals to keep the fish alive during closures and to provide suitable spawning and rearing grounds. Our great pondage reservoirs too, if they are ever taken up, would be ideal sanctuaries for all kinds of fresh water fish. The matter had already been under consideration, but now, stimulated by what has been accomplished in Bengal, we shall lose no time in taking up seriously the question of what may prove to be an important addition to the food supply of the country.

"In the Fishery Exhibit you will also read of the small fish of the Barbados known as milliones and see the corresponding Bengal fish which are said to reduce the mosquitos by living on the larvæ. I am sure that we shall all welcome these interesting strangers and give them every facility for gratifying their most admirable taste in diet. Any and every means of reducing the malaria scourge, whether it be sanitation or drainage or quinine prophylaxis or mosquito destruction, are welcome, and all will have a fair trial, as this scourge is one of the greatest evils with which we still have to deal in the Punjab. I do not know that sanitation is altogether an industry, but as good sanitation is essential for all industries the Exhibition authorities make no apologies for showing a most valuable exhibit under this head. You will also see in this section the whole process of making quinine tablets. We hope to be able to sell five-grain tablets at one pie apiece or three for a paisa or 12 for an anna. Let us hope that with milliones for the mosquitos and quinine for the millions we may be able to do something at any rate to reduce the terrible sickness and mortality due to malaria. The Sanitary Department are also showing types of sanitary and insanitary houses for peasants and others. In the matter of sanitation, however, Government cannot act alone, and I therefore earnestly beg all men of education and influence to come forward and help us in our formidable task of teaching the people the advantages of sanitation and of inducing them to do what they can to carry out the lessons which they are taught. The exhibits are an excellent object lesson which all should study.

"I am sure that you will agree, when you have gone over the Exhibition, that much has been done for agriculture and its subsidiary industries, and we may hope that with the opening afforded by the Agricultural College and the expansion of science classes in our other Colleges the people of the country will themselves turn to the study of this the first and still the most important industry of all. Experience is a good teacher, and the people of the Punjab are admirable farmers, and know well how to cultivate the staples available to them. But science still can do a great deal to improve those staples and to introduce others, and to trace the causes and ascertain the cure of blights and plant diseases, and last, but not least, to prove the value and to reduce the cost of artificial fertilisers which are not at present known to the people or within their purchasing capacity.

"To turn to other Industries. Here I am afraid that I have not so dazzling a picture of successes to unfold before you. Still Government has played its part, and in the North-Western Railway system, 4,300 miles in length, we have one of the largest railway systems in the world and the largest system worked by one Administration in India.

"With its feeders in the lines of the Darbars of the Phulkián States and Máler Kotla, the Southern Punjab, Delhi-Umballa-Kálka, Sutlej Valley and Amritsar-Patti lines and its strategical extensions, it commands the whole of the Punjab and links us up with our port at Karáchi, which, though under another Administration, is really the port of the Punjab, on whose rivers it depends, on which it draws for colonists to till its lands, and on whose trade it prospers. Though the railway earnings are obscured by the necessary strategical lines, which show but poorly in a balance-sheet, I believe that, so far as the commercial sections go, it is one of the most paying systems in India. Certainly, as far as the Punjab is concerned, this holds good. The Colony lines pay a very high percentage indeed, and in the Punjab proper there is hardly a place in which a railway does not pay well. This is the happy experience of the Patiála, Jínd and Máler Kotla Darbars, and of the different private lines in the province; and it is a subject for regret that the people of the Province have not realised their opportunities, but have for the most part allowed the profits of these lines to go to others. I trust that this will not always be the case. There are several promising lines ready for construction, and now is the time for Punjabis to come forward and to make these themselves. Statistics are wearying, but the figures for railway development on the main system since 1886 command attention.

"The capital expenditure has risen from 220 millions of rupees to 678 millions, the gross receipts from 25 millions to 56 millions, the number of passengers carried from 10 millions to 40 millions, and of tons of goods lifted from 2 millions to 9 millions.

"We owe much to our railways, and I am glad to have this opportunity of thanking the Management of the North-Western Railway for the liberal way in which they have lent us materials, provided train facilities, and generally come to our assistance. Indeed, without their help we could not have built the Exhibition at all.

"We look to a continuance of that help, and as our Punjab sections pay so well, I for one would like to see suitable godowns, if not elevators, built throughout the Colonies and exporting tracts to reduce the losses and delays from which the people now suffer. Thanks to Captain Osborne, we have secured a model elevator which will show us all how the system is worked, and perhaps the experience so gained may lead to the erection of farmers' elevators here as in America, where this form of co-operation is in especial favour. Such elevators might perhaps be an offshoot of the Agricultural Co-operative Societies which are already doing so much for the welfare of the people.

"Then there is the case of Sericulture, and here we must acknowledge our debt to His Highness the Maharaja of Jammu and Kashmír. Owing to disease of the worms, silk cultivation both in the Punjab and in the State had practically died out. My friend Sir W. Lawrence, as Settlement Commissioner of Kashmír, conceived the idea of starting it again, and was warmly supported by the Darbar. With the assistance of the Resident, Sir A. Talbot, and the advice of Sir T. Wardle of Leek, whose recent death has been a great loss to sericulture of India generally, the industry was revived and eggs were imported free from disease from France and Italy. In the earlier years the usual checks occurred, and I am happy to think that I was in part the means of strengthening the determination of the Darbar to persist in the experiment and of placing it on a good working basis. The success achieved has been phenomenal. You will see for yourselves what magnificent silk Kashmir can produce and what lovely fabrics are being woven of it in the valley. The industry in 1908 gave employment to no less than 76,000 persons in growing the silk, 19,000 rearers and their families, and to over 8,000 persons in spinning it. A sum of Rs. 4½ lakhs was paid out as the price of cocoons and over 3 lakhs went as wages to the spinners, while the Darbar reaped a net profit of Rs. 6½ lakhs. The industry has gone far to replace the old shawl industry, which, owing to changes in fashion, had sadly decayed, bringing ruin upon the unfortunate workers. Shawls are still made, however, and at any time a change in fashion may revive what was the leading industry of Kashmír, and the Darbar will, I am sure, be ready to seize their opportunity.

"This success in the sister State has emboldened us to attempt the revival of the sericultural industry in the Punjab, and we have already made a small but promising beginning on similar lines. The conditions are of course not so favourable as we have not the resources of the Darbar or its command of money, materials and labour; but I am hopeful as to the future, and I commend the industry to the notice of the capitalists present. The silk market, especially in America, is rapidly expanding and is large enough to take at very remunerative rates all the silk that India can produce and to clamour for more.

"There is another very special feature of the Kashmír silk industry which brings me to a subject very near to my heart, and one which I believe to be at the foundation of any great industrial development in the North-West of India. The filatures are lighted and run and the basins are heated by electricity. Gentlemen, we owe a great deal to the Protected Princes of India. In many directions they have shown us the way, but in none have they done so more boldly and more successfully than in electrical developments. We all

know the happy results of the Mysore Darbar's daring experiment of harnessing up the Kaveri Falls and carrying the power 92 miles to the Kolar gold fields. For this that veteran statesman Sir Sheshadri Ayar was responsible. I am glad to see here one of his distinguished successors Mr. Madhava Rao. For years I had thought over the possibilities of developing the great water power of our rivers and canals, and I bequeathed my ideas to Sir L. Tupper when I left the Punjab. In Kashmir it appeared that something might be done on the Mysore lines. I approached the Darbar, and His Highness the Maharaja took up the idea at once. His chief minister and brother, Raja Sir Amar Singh, ably supported His Highness' views. Gentlemen, I would here ask you to join with me in expressing to His Highness the deep sympathy which we all feel with him in the irreparable loss which he and the Darbar have sustained this year in the death of his brilliant brother. I had known him ever since I came to India, and, as he was a great personal friend of mine, I can confidently say that I have met few men his equal in force of character and great administrative abilities. His thoughts and energies were always directed to the welfare of the Darbar and of the State, and it must have been some solace to him in dying to think that he, working as His Highness' chief minister, had succeeded in placing the State on a sound basis of well-ordered government and prosperity such as it had never enjoyed even in its palmiest days, with the most brilliant prospects of future advancement and wealth.

"Well, Gentlemen, the Darbar invited Major de Lothbinère to help them. He expanded my more humble ideas, and leaving the Sind and Lidhar projects boldly tackled the Jhelum itself as a source of power, and there now exists at Mahura near Baramula a plant capable of generating 20,000 H.-P., of which 15,000 H.-P. are at present available for industrial enterprise; and I invite the attention of capitalists to this great opportunity of developing the industrial resources of the fair valley of Kashmír in the confident hope that the Darbar will meet their overtures in a fair and liberally-minded spirit. But this is not all that the Jammu and Kashmír Darbar have done for industries. It was largely their liberality which has enabled Mr. Brennan to complete the full-sized model of his gyroscopic mono-rail which has recently been tested with success in England. We have hoped that this would revolutionise the prospects of a railway to Kashmir and of feeder lines and branch railways in India, and especially in hilly tracts. For this reason the expensive project for a steam line up the Jhelum valley has been held over, and I congratulate His Highness warmly on his foresight. I confidently now look for the completion of a Brennan line joining his summer and winter capitals which will open up his whole State and render possible the development of the iron, coal, copper and bauxite resources which he has had under earnest examination for the past eight years.

"The States have thus gloriously set the way in electrical developments They can do this as they are happy in the possession of disposable capital and of a more flexible system of government capable of acting without undue discussion and delay. Here in British India we are hampered by the fact that there is no stored-up State capital, and we have to depend on loans for public works. Loan capital cannot well be expended on new ventures, and so development is hindered. A Provincial Government has not even this resource of loans, and the funds at its disposal barely meet the humdrum necessities of administration and leave nothing over for development. I suppose it must be so, but, seeing the opportunities that exist in this country and the profitable use which a good and far-seeing officer is able to make of any small amount of money that he may be able to secure, it has often filled me with despair to see how such good officers are shackled lest their less go-ahead and far-sighted brethren should do harm. However, personal government may have had its day, though personal energy and influence will still always make themselves felt. Corporate effort may make good the defects now apparent, and at any rate we must all loyally endeavour to make our new

venture a success, which it should be, as the spread of education opens out vistas of hope that our young men will apply themselves to the development of their country in reality, and so this glaring deficiency of our system of administration as contrasted with that of the States may be wiped out.

"At any rate something has been done even in existing circumstances to place the North-West Frontier and the Punjab somewhat on an equality with Kashmír in the matter of that power without which no real industrial development on a great scale can take place. It was my good fortune to be able to point out to the originators of the Upper Swat Canal that they had a great potential source of power in the tunnel through the Malakand. The designs were altered, and we have secured there a fall which will generate up to 25,000 H.-P. in the centre of a tract which teems with prosperity and is endowed with a most enterprising population, and which can best be developed by electrical railways if it is to reap to the full the great advantages it will enjoy when the whole canal system is opened up.

"Nearer home, the Punjab Government has been earnestly scrutinising all possible sources of power. There are the small pioneer works of the Suján-pur Sugar Works and the Dháriwál Woollen Mills on the Bari Doab Canal. A suitable site for some 9,000 H.-P. exists on the Bari Doab Canal near Mádhopur and another on the Western Jumna at Dádupur. We are proposing to harness up the Tarn Táran fall near Amritsar to work the canal workshops and meet the municipal requirements for power and also to pump from the over-saturated subsoil. In this way we hope not only to unwater swamped tracts and diminish the sickness due to malaria, but also to provide new and increased sources of irrigation and so benefit the country in both ways.

"Most of our canal sources of power, however, are open to the objection that during canal closures no power can be generated, and on canal branches such closures are, and must be, not infrequent, owing to the paramount necessities of the irrigation system. We have, therefore, turned our eyes further afield, and hope to secure larger stations on the rivers before they leave the hills. One such station is being equipped on the Nauti Khad near Simla where it falls into the Sutlej. This will furnish a perennial supply of power sufficient for the needs of Simla, and perhaps also for a timber and wood-pulping industry which it is hoped to establish on the Sutlej. The scheme is the result of a suggestion of the Simla Extension Committee of 1898, and, though a small thing in itself, may prove the pioneer of more important undertakings.

"Other sites have been examined on the Chenab in Jammu and on the Sutlej and Ravi in British Territory. Enough has been done to show that in our rivers we have a practically unlimited source of perennial power supply, though it may be years before we shall require these. One source of power will, I trust, soon be available. The Upper Jhelum Canal at Rasúl runs about two miles away from the Lower Jhelum Canal Head Works, but at an altitude about 78 feet above the lower canal. It will be necessary to feed the lower canal from the upper channel in order to avoid losses in the river bed, and 5,000 cubic feet of water must be passed from the upper into the lower canal. By dropping this over the high cliff at Rasúl into the Jhelum, a fall of perhaps 70 feet can be secured, which will, if required, yield some 35,000 H.-P. When the Upper Jhelum Canal is opened Rasúl will be a fairly central point for the whole of the western canal tract and close to the portions of it best suited for cane and cotton. It is also close to the healthy highlands of the Salt Range which can never suffer from excessive irrigation. The supply will be almost perennial, as, except for closures for repairs, the Upper Jhelum Canal must run always. The power should be available within two years, and all that is wanted is to secure a market for it. Here we must mainly rely on the assistance of the public, but

such a market might perhaps be obtained in part in the great salt mine of Khewrah, turning out with primitive appliances some 115,000 tons of salt a year. The conditions of labour and the outturn would of course be enormously increased by the application of electrical power with mechanical cutters and light, and the cost of production would be much reduced. Here again the question of markets come in. Should we find a market for the increased output? This should not be impossible, as German salt now competes with Indian salt as far up country as Patna, and if industries increase a greater consumption of salt in these will be a natural result; while eventually with cheap railway rates and facilities a market over seas may be opened. The quantity of salt readily available on this one site is inexhaustible, while its quality and purity are of the highest grade. The salt mines of the Salt Range and of Kohát form one of our greatest industries in North-Western India, and I should be very loth to see anything done which would injure the prospects of our hardy salt miners. But the introduction of machinery would not do this, as there is another market for their labour at higher prices at their doors in our Salt Range coal fields. Private enterprise is at last beginning to nibble at the edge of this. A coal of better quality has been found in the Isa Khel tahsil across the Indus, and the Geological Department now believe that coal exists widely over the plateaux on the crest of the range, of which at present only the outcrops are being worked. This coal may also be of better quality, and at the instance of the Local Government an attempt is now being made to prove the field by deep borings. If successful, there will be a great field for the employment of cheap electrical power within 50 miles. The Mayo Salt Mine is only 31 miles from Rasúl, and with the modern improved transmission such distances are simple. The products of our coal and salt mines and accounts of the industries are all on view in the Exhibition, and again I invite the attention of capitalists, so that some relief may be given to Government, which is at present bearing practically the whole cost of developing the coal field

"So far I have dealt mainly with the great primal industry of agriculture with its handmaid irrigation and with the basic elements of indstrial success in the form of power. I am not, I am afraid, competent to deal with the Ladies' Section, and I must refer you to Lady Dane. This and the allied exhibit of the School of Art will, I am sure, attract as much atteention as the more serious and less interesting features of the Exhibition with which I have been dealing, while I look to the competitions in the arena and to the side shows to relieve the tedium of too much science, as I am a firm believer in the truth of the old adage of all work and no play makes Jack a dull boy.

"On the question of minor industries I need not detain you long. The carpets of the Punjab and Kashmír have long been famous, and you will find excellent specimens of the art here. Happily here private enterprise has come forward to relieve Government, but we must not forget that the industry was started by Government in the jails, though these are dropping out of the field as private enterprise meets the public demand.

"Of the products of other industries of the Province in the shape of yarns, textiles, woollens, leather work, flour and biscuits, the Exhibition contains a good show. Our factories have grown from 7 in 1881 to 264 in 1909. The capital invested in cotton and woollen spinning and weaving mills in 1891 was 17 lakhs of rupees, it is now over 80 lakhs. It is not a very brave show as compared with other Provinces more favourably situated as regards power, but all credit is due to the pioneers of this important branch of industry, who, in spite of the almost prohibitive cost of coal, have managed to hold their own with rivals working with cheaper fuel and

possibly cheaper labour. In 1881 the paid-up capital of Banking and Insurance Companies was only 18 lakhs, in 1891 it sank to 12 lakhs, but has now risen to 42 lakhs. Our general trade has fully shared in the general development of the country. Imports have risen from three million maunds, worth two crores of rupees, in 1868-69 to forty million maunds, worth twenty-six crores, in 1908-09; while exports have increased in the same period from three million maunds, worth two and-a-half crores, to sixty-three million maunds, worth twenty-nine crores. I have referred to the enormous exports of raw agricultural produce. Much of this consists of cotton and oil-seeds, both of which might with the greatest advantage to the country be worked up locally and the manufactured article exported. The growth of irrigation ensures a steadily increasing output, and even our cautious agricultural experts allow themselves to hope that they are on the brink of the discovery of a class of cotton suited to the soil and climate which will fetch a much higher price in the market. The results of the sales of this improved staple are as follows:—

		Acres.	*Mds.*	*Selling at Rs. above ordinary cotton price.*
1908	...	587	3,300	1·7
1909	...	1,054	4,750*	1·8

Then, too, much can be done to improve our sugar output. At present we are working in a peddling way with small separate presses and boilers scattered all over the country. Modern inquiry shows that to be successful in these days of cheap transit charges there must be concentration and co-operation, and that in the case of sugar especially the battle is to large mills in the centre of a tract devoted mainly to sugar-growing. Such tracts exist in the Punjab. I would instance the Riárki tract and the country round Aliwál in the Batála tahsil and the central tract on the Western Jumna Canal where excellent cane is grown and where water power is available. The Sujánpur Sugar Works in the Pathánkot tahsil were not a great success on sugar alone, but they were put in the wrong place, just outside the sugar-growing tract, and their difficulty in carrying sugarcane is only another argument in favour of the policy of concentrating effort in small areas devoted mainly to cane. Here again the Colonies may help us, as 56,000 acres of cane were raised in the Chenab Colony last year with very satisfactory results in a tract where cane was absolutely unknown before, while the output of gur on the canals amounts at present to three million maunds. Some form of co-operation would secure the necessary capital, and I trust that our Punjab agriculturists will not fail to seize and make the most of their opportunities now while they still have a surplus of income over expenditure, and not fritter this away until the growth of population checks their present prosperity.

"The mention of the Sujánpur Works started by Mr. Frank Halsey reminds me of our important woollen factory, the Egerton Mills, at Dháriwál opened by his civilian brother. Though he shared the not unusual fate of pioneers of a new industry established without a full backing of capital, and his company eventually failed, his enterprise was on the right lines, and the fortunate purchasers have reaped a large profit from his labours, and his memory as one of the pioneers of industry should not be forgotten. Their goods are known all over India and are all on view here.

"Then we have specimens of hand-looms of all kinds, including the improved fly-shuttle and special automatic looms by which we hope to relieve the labours and increase the incomes of the important class of cottage weavers in this Province. The Salvation Army are taking a promi-

nent lead in this matter, and hope eventually to be able to enable even the criminal tribes, who are at once our anxiety and our despair, to gain an honest living. I invite you all to view their pavilion and to see and buy the Dane horse jhuls and suitings. Unfortunately I shall not share in the profits of your large purchases, as I have no share in the concern, though the provincial weaving school is known by my name.

"It is worth noting that even at Dháriwál some 140 fly-shuttle hand-looms are working for certain classes of cloth, so there is no reason to despair of the future of our hand-loom weavers; while the fact that the Dháriwál authorities have been able to teach local boys of all classes to work in their mills is an augury of hope for the future supply of mill hands for the Province generally.

"The glass factory at Ambála has sent in a small but interesting exhibit. This too failed to secure the success which it deserved when first started, but it is now being conducted on sound business lines, and in view of the ever-increasing demand for all kinds of glass in the Province, it ought to have a great future. It is curious that such a factory has never been started before, as the indigenous glass works at Pánipat have been in existence for centuries, though unfortunately they have never attempted to go beyond the rudiments of the industry.

"Then there are the Siálkot Uberoi sports factories, at which you can acquire materials for every sort of game. These are already world famous and export to England and even to Germany. We have also the pottery and tiles of Multán and a most interesting exhibit of porcelain from the adjoining State of Bikáner, whose enlightened ruler has taken a lively interest in our Exhibition. He has also sent the beautiful stone pavilion at the end of our main arcade, and I would draw attention to the splendid resources of this State in stone and the artistic manner in which that stone is worked up. The quarries are nearer to us than Agra, and there should be a keen demand for their produce in this Province. Then we have the marble and stone of the Narnaul quarries in the Patiála State which only need a market for their full development, and the slates and slabs of the Punjab State quarries of Rewári and Kanyára in Kángra. I must not, however, weary you with a detail of all the industries of the Province. You have a microcosm of them all here, and the Local Government is preparing, through the agency of Mr. Alma Latifi, I.C.S., and the Director of Industries, Mr. Hamilton, a revise of the monographs of all our industries, in which they will be brought up to date and set forth to tempt the capitalist to embark on them.

"Annually one or two students are being sent to Europe at Government expense to study various industries, – textiles, tanning, mining, glass working, &c.,—and these experts on their return should be able to teach others and so assist in the expansion of industrial effort.

"His Majesty's Secretary of State has recently sanctioned the proposals of this Government for an improved Engineering School where we shall train sub-overseers, drivers, fitters and mechanical and mining engineers generally. At present this is the class of men of whom we stand in special need, but I do not propose to stop at these, and I have every hope that a College Department will soon be added to the school where we can train our young men for the higher branches of the profession. I propose, for the reasons which I have already given, to locate the school at Rasúl, where the students can see with their own eyes some of our greatest engineering triumphs and study mining practically. It is healthy, not too near a large city with its demoralising influences, and sufficiently far north to prevent the school and college from competing unduly with Roorki. Great though the record of Roorki is, and deservedly so, still we employ more Government engineers in the Punjab than any other province does, and it is quite time that we should train our own men and not be largely dependent on the leavings of other Provinces.

I have already received a promise of Rs. 10,000 towards the cost of this school, and I trust that others will follow the excellent example set, and so enable us to evolve an institution worthy of the three countries whose wants it will meet. Such a college would be a fitting and lasting memorial of this great Exhibition, and I trust that the public will co-operate with Government in starting it on suitable lines from the very outset, so that no time may be lost in giving opportunities to our young men to qualify for the industrial arts at least equal to those which they will obtain for agriculture at the Agricultural College.

"In any case this Exhibition will leave a landmark, as the groundon which it is being held will form part of the Minto Park, which I hope to see ready before I give over my office, and which will form at once a memorial of the historic visit of the author of the Reforms to this city, a most picturesque and beautiful setting to the old royal buildings in the old Fort which lends a peculiar distinction to this site, and a convenient pleasure resort for all classes of the capital of the Punjab.

"I am afraid, Gentlemen, that I have trenched too much on your good nature, but it seemed to me that, just as we are at the parting of the ways in the matter of the method of administration of this great Province, it was only right and proper that we should take stock of the past history of agriculture and industries in the North-West of India and review our present position and future prospects. It has been my good fortune to have spent almost my whole service of 33 years in the Punjab, the North-West Frontier, and Kashmir,—in fact in the Punjab as it was up to 25 years ago and as it is still shown on the maps of the Survey Department and as our Exhibition treats it—and to have held appointments which enabled me to see at first hand much of what has been done in these lines. I have therefore ventured to ask you to view the situation through my eyes. They are the eyes of a sanguine observer, perhaps even of an enthusiast. But, Gentlemen, without enthusiasm nothing yet ever was accomplished in this world. The cautious creeping creature who lets 'I dare not wait upon I will' has never done anything in life. A man who never made a mistake has never made anything. The countries here represented have been great in war. The Punjab furnishes not only the backbone, but almost the whole frame of the Indian army, the North-West Frontier is the lance-head, and His Highness the Maharaja of Kashmír is the Sipar-us-Sultanat, the shield of Empire. They are equally great in agriculture, and I see no reason, with their great natural advantages, why they should not be equally great in industries and manufactures. But a timid policy will not secure that greatness, and if success is to be achieved the talent must not be hid in the napkin. A wave of prosperity has come to us; let us seize the opportunity and devote the combined wealth and brains of the community to establishing our manufactures on a broad and stable basis, so that founded on the twin rocks of agriculture and industry the prosperity of the Punjab in its widest sense may be secured for generations. I apologise also for the somewhat undue prominence of the personal pronoun in my remarks, but here again I was bound to give you the authority for my story. Though all authorities enjoin the necessity for taking the long view in such matters, it may be that I am looking too far ahead, and that our power resources will not be utilised for years. This is more than possible, though it is a grievous thing to contemplate any serious delay in a matter so vital to the best interests of the country, for if neither water power nor coal is developed, our industries must remain dormant, and others will benefit by the working up of our raw produce which we should do ourselves. My visions may be but dreams, though golden ones. Still I can appeal to practical successes in the past. I have devoted the best years of my life to the consideration of all possible contingencies, and I have confidence in the

future. I shall not see the realisation of these schemes as my term of service draws rapidly to its close, but happily we do secure a continuity of administration, and, if the schemes are sound and stand the test of criticism, my successors will follow where I have trod. In any case it will always be one of my most cherished memories that I was privileged to take part in this interesting ceremony, supported by the help and presence of the ruling princes of Kashmir and of the Punjab States whose interesting courts are some of the main features of the Exhibition, and sustained by the sympathy of the Chief Commissioner of the North-West Frontier; that I was able to bear my testimony in public to the great services rendered by the officers of the Irrigation Department and others who have worked in the battle-fields of peace for the benefit of the country; and that in opening this great Exhibition organised primarily by the advanced leaders of political thought the other patrons and I were able to show our good will towards all workers for the public good and our earnest anxiety to assist any project which tends to the betterment and prosperity of the Provinces and States here represented. If any of the ideas suggested by this Exhibition, fertile as it must prove in such ideas, fructifies for the benefit of the people, we shall all of us have reaped an ample reward, and in opening the Exhibition I invite you to join me in thanking the organisers for their public-spirited efforts for the common weal and in wishing them all possible success in their venture."

"I declare this Exhibition open in the name of the greatest patron of all the arts and industries of Peace—His Majesty the King Emperor."

Offg. Chief Secretary to Government, Punjab.

REVENUE AND AGRICULTURAL DEPARTMENT.

AGRICULTURE.

The 13th December 1909.

No. 237.—Notification.—In supersession of Punjab Government notification No. 23 S., dated 22nd May 1901, and in exercise of the powers conferred on him by section 25 of the Punjab Alienation of Land Act, 1900, His Honour the Lieutenant-Governor of the Punjab is pleased to make the following rules :—

RULES.

I.—If any alienation of land is made otherwise than in accordance with the provisions of the Punjab Alienation of Land Act, 1900, or involves any condition contrary to those provisions, the patwari shall nevertheless enter the same, when it comes to his knowledge, in his register of mutations for the village where it occurred.

II.—Any entry made under the preceding rule shall be dealt with like other entries in the register of mutations except that the revenue officer to whom the register is submitted for orders shall, after hearing the parties and recording a note of their representations,—

(*i*) in the case of any permanent alienation, transmit the mutation proceeding with his recommendation, as to whether sanction should be granted or refused, to the Deputy Commissioner for his orders under section 3 (2) and (3) of the Punjab Alienation of Land Act; or,

(*ii*) in the case of any temporary alienation, refuse to sanction mutation of names and refer the parties to the provisions of the Punjab Alienation of Land Act which they have contravened.

III.—The Deputy Commissioner on receipt of any mutation proceeding transmitted to him under rule II (*i*) shall, after such further inquiry, if any, as he may consider necessary, grant or refuse the sanction required by sub-section (2) of section 3 of the Punjab

Alienation of Land Act. For the purposes of any further inquiry under this rule the Deputy Commissioner may refer the case to any revenue officer subordinate to him for investigation and report, and may decide the case upon the report.

IV.—When the Deputy Commissioner has decided any case dealt with under rule III, he shall record his order upon the mutation proceeding and direct the same to be returned to the revenue officer whose duty it is to dispose of mutation cases arising in the village where the land alienated is situated.

V.—If the Deputy Commissioner sanctions the alienation, the record of his sanction made upon the mutation proceeding shall be deemed to be sufficient evidence of the order of sanction for the purposes of section 18 of the Punjab Alienation of Land Act, and the revenue officer whose duty it is to dispose of the mutation case shall dispose of the same and shall not refuse mutation on the ground of any objection arising out of the said Act.

VI.—If the Deputy Commissioner refuses to sanction the alienation, the revenue officer disposing of the mutation case shall pass such order in the case as may be in accordance with the order of the Deputy Commissioner refusing sanction.

VII.—When a mutation proceeding has been transmitted to the Deputy Commissioner under rule II (1) the transmission thereof shall be deemed to be an application to the Deputy Commissioner to exercise the powers conferred upon him by section 3 of the Punjab Alienation of Land Act. Such application need not be stamped nor is any separate application necessary for the exercise of those powers in the same case.

VIII.—Nothing in these rules shall be construed as to disallow applications to the Deputy Commissioner for the exercise of any power conferred upon him by the Punjab Alienation of Land Act, 1900, which are made in any other manner authorized by law or by rules having the force of law.

ORDER.

Preliminary.

Short title. 1. This order may be cited as the Jagádhri Light Railway Company Order of 1908.

Interpretation clause. 2. The several words and expressions to which meanings are assigned by the Indian Tramways Act, XI of 1886, shall have in this order the meanings assigned by that Act, provided that in this order the expression the "Tramway" or the "Undertaking" shall mean the tramway and works and undertaking by this order authorised.

Conditions applicable.

3. The tramway authorised by this order shall be constructed, maintained and worked in accordance with the Indian Tramways Act, XI of 1886, and subject to the provisions of this order.

Promoters.

4. The Jagádhri Light Railway Company, Limited, shall be promoters for the purposes of this order and are in this order referred to as "the Promoters," and this expression shall, except where the context may require a different construction, include the company to be formed and to be called "The Jagádhri Light Railway Company."

Description of tramway authorised.

5. The promoters may construct and maintain, subject to the provisions of this order, and in accordance with the plans and sections to be deposited for the purpose of this order, the tramway hereinafter described with all proper rails, bearings, offices, station buildings, works and conveniences connected therewith, or for the purposes thereof, and may work and use the same. The tramway authorised by this order is a single line from Jagádhri railway station on the North-Western Railway to Jagádhri city, a distance of about four miles approximately, with necessary crossings at (*i*) district board road from the village of Damlah to Jagádhri railway station on North-Western Railway, (*ii*) district board road from Gobind Puri village to Jagádhri city, and (*iii*) provincial road from Ambála to Sahákranpur close to Jagádhri.

Construction of bridges and culverts.

6. The promoters shall construct at their own cost, for the purposes of the tramway, all necessary bridges and culverts of such design and in such a manner as shall first be approved by the road authority, and shall complete the same to the satisfaction of the said authority.

Promoters authorised to use road subject to limitation.

7. The promoters may use for the construction of the tramway, but not for the purpose of any building or erection connected therewith, those portions of the road necessary for the three crossings indicated in clause 5.

Lopping trees without permission or urgent necessity prohibited.

8. The promoters shall not, without the consent of the Deputy Commissioner or the district board in writing, cut down or lop any tree growing along or by the side of the road except that in case of emergency the promoters may remove or lop the branches or any portion of a tree which projects or hangs in such a manner as to be a source of danger or impediment to the tramway traffic.

Powers of Government to authorise interference with tramway in carrying out necessary works.

9. In the event of any necessity arising for carrying out in or on land occupied by the tramway any work connected with any sewer, drain, telegraph line, gas pipe, water-pipe or any other thing, the Local Government or such person or persons as the Local Government may appoint by general or special order for the purpose, may, by notice in writing to the promoters, call upon the promoters to show cause why any portion of such tramway should not be closed for traffic to enable such work or works to be carried out safely, and, after considering the necessity for closing such portions of the tramway as well as any objections or suggestions which may be made by the promoters, may direct that the promoters shall close any portion of the tramway for such a period of time and under such other conditions as in the circumstances of the case may appear to be necessary, and may also direct that a temporary tramway in place of the portion removed shall be constructed and used, and may prescribe any conditions under which such temporary tramway shall be constructed and used.

The promoters shall be bound to comply with such directions and allow the work referred to therein to be carried out: Provided that unless otherwise directed, any portion of the tramway which it may be necessary to remove, in order to the carrying out of such work, shall be removed and reinstated by or at the expense of the Government, the local authority or the person or persons as the case may be by whom the work is carried out.

Condition on which promoters allowed to interfere with structures in or on road.

10. In the event of the promoters desiring that any drain, telegraph line, gas-pipe, water-pipe, or other thing in or on the land occupied or to be occupied by the tramway should be interfered with, or that the position of any one of them should be altered, the promoters shall give notice in writing to the local authority, the road authority or any officer in charge of the thing or things to be

interfered with or altered, and such authority or officer may pass such order on the application as in the circumstances of the case may appear fit: Provided that the promoters shall not be in any case entitled to require any interference with or alterations of any main sewer or drain or the position thereof.

Date for commencement and completion and opening of tramway.

11. (1) Construction shall be commenced within six months of the date of the application of this order and the tramway completed, equipped and opened for public traffic within one year from date of commencement; provided that the tramway or any portion of it shall not be opened for public traffic until an engineer appointed in this behalf by the Local Government has inspected it and certified it to be fit for such traffic.

(2) In the event of the said promoters failing to commence the construction and equip the tramway as provided in the first paragraph of this clause, then in any such case the Local Government shall be at liberty to revoke this order and thereafter enter into arrangements with any other person or persons for the construction of a tramway from Jagádhri railway station on the North-Western Railway to Jagádhri city, and in the event of this order being revoked by reason of the said promoters failing to complete and equip and open for traffic the said tramway within a period of one year from the date of commencement of construction, the Local Government shall have the option of taking over all the permanent-way and rolling-stock of the tramway at a reasonable valuation to be determined by the Local Government; and in the event of the Local Government exercising this option, all the other works and the buildings of the tramway may be dealt with under the provisions of the Act relating to the discontinuance of tramways, as a tramway whereof the discontinuance has been proved to the satisfaction of the Local Government. If, however, the Local Government do not desire to exercise the option of taking over the permanent-way and rolling-stock of the tramway as herein provided, then and in such case the tramway including the permanent-way, the rolling-stock and all the buildings and works of every kind connected therewith may be dealt with under the provisions of the Act relating to the discontinuance of tramways, as a tramway whereof the discontinuance has been proved to the satisfaction of the Local Government.

(2) The promoters shall at their own cost provide gates with gate-keepers' lodges, and shall maintain at their own cost gate-keepers at such level crossings or bridges crossed by the tramway as the Local Government may from time to time direct.

Promoters making crossings, &c., to comply with the orders of Government.

16. Subject to the approval of the local authority, the promoters may from time to time hereafter make all such crossings, passing places, junctions and other works in addition to those particularly specified in and authorised by this order as may from time to time be necessary or convenient to the efficient working of the tramway or for providing access to any station building or work of the promoters. And all such works shall when sanctioned by the Local Government be completed to the satisfaction of the Local Government.

Temporary tramway in place of portion interrupted.

17. When from accident or flood or by reason of the execution of any work affecting the surface or soil of the road along which the tramway is laid it is in the opinion of the Local Government necessary or expedient temporarily to remove or discontinue the use of the tramway or any part thereof,

the promoters, subject to such conditions and in accordance in all respects with such regulations as the Local Government from time to time may make, may construct and maintain so long as occasion may require a temporary tramway in lieu of the tramway or part of the tramway removed or discontinued.

Accommodation for post offices and postal staff.

18. The promoters shall, when required to do so by the Local Government, construct at the cost of capital accommodation at railway stations for post offices and quarters for the postal staff and shall lease the same to the post office at a rental not exceeding 7½ per cent. per annum of the cost of construction excluding the cost of the site.

20. The promoters shall, within three calendar months of being called upon by the Local Government to do so, be bound to provide at their own expense fencing on both sides of the tramway, either along the whole or any part of its length, and shall carry out and complete the work in such manner and in such time as the Local Government may direct.

Route and construction of siding.

21. The tramway shall enter the municipal limits of Jagádhri through the Garhi Gate, and shall pass thence along the Southern Bazar. The promoters may construct a siding near the Shankar Lalwala house.

24. The promoters shall at all times maintain and keep in good condition and repair to the satisfaction of the Local Government, and so as not to be a danger and annoyance to the ordinary traffic, the rails and substructure of the tramway.

Alterations in position or level of tramway.

25. The promoters shall at their own cost alter the position or level of the tramway to suit any future alterations in the level of any of the provincial or district board roads at the point of crossing, and forthwith repair, make good and reinstate to the satisfaction of the District or Executive Engineer any other portion of the road which shall at any time be in any way damaged by reason of any fault of the promoters or any accident to or upon the tramway.

Structure of carriages and accommodation, &c., to be provided.

26. The carriages used on the tramway for the conveyance of passengers shall be so constructed as to afford shelter and protection from sun and rain, and separate accommodation shall be furnished for upper or first class passengers. The promoters shall adopt and apply such improvements in the tramway and in the carriages used thereon and in the fittings, appliances and apparatus of such carriages as the Local Government from time to time consider necessary or desirable for the safety and convenience of the public.

Traffic upon the tramway.

Traffic promoters may carry.

27. The tramway may be used for the purpose of carrying passengers, passengers' luggage, animals, goods, fuel, minerals and parcels. But the promoters may refuse to carry any persons and any animals suffering from any infectious or contagious disorder and any articles that may be of a dangerous or offensive nature: Provided that this shall not restrict the right of local authorities to make rules under sections 24 to 26 of the Indian Tramways Act, 1886.

Prohibiting undue preference.

28. The promoters shall not as between members of the public make or give any undue or unreasonable preference or advantage to or in favour of any particular person or company or any particular description of traffic, or subject any particular person or company or any particular description of traffic to any undue or unreasonable prejudice or disadvantage.

Patterns of carriages to be approved by local authority.

30. Every carriage used on the tramway shall be constructed of a pattern approved by the district board of Ambála and so as to provide for the safety of passengers and for their safe entrance into, exit from, and accommodation in, such carriage and for their protection from the wheels.

Brakes to be used.

31. Every train when running on the tramway shall be provided with an efficient brake to be worked by the guard in charge of the train.

Deputy Commissioner may provisionally prohibit use of carriage.

32. The Deputy Commissioner may whenever he thinks fit prohibit the use on the tramway of any carriage which in his opinion is not safe for use thereon. Every such prohibition shall hold good until the same is either confirmed, set aside or modified by the Government of the Punjab; and the promoters shall be bound by any order passed by the said Government of the Punjab respecting any such carriage.

Tolls leviable by promoters.

33. The tolls authorised to be levied shall be paid to such person and at such places upon or near to the tramway and in such manner and under such regulations as the promoters may by notice annexed to the list of tolls, exhibited under sub-section (2) of section 15 of the Indian Tramways Act, 1886, with the previous sanction of the Government of the Punjab, appoint.

Running of trains.

34. No train shall be run between sunset and sunrise, except with the previous consent of the Local Government, and upon such conditions as may be approved by them.

Train lights.

35. (1) During foggy weather every train shall exhibit a red tail-light and two red side-lights in rear of the train, and every engine running alone, during foggy weather, shall exhibit at least one red tail-light.

(2) The same train and engine lights shall also be used on the train and the light engine when any train runs between sunset and sunrise.

Miscellaneous.

Crossing of tramway by any railway or other tramway.

36. In the event of its being necessary, under the authority of the Local Government, for any railway or tramway line other than that referred to in this order to cross the tramway on the level or otherwise, the promoters shall not be competent to raise any objection; provided that such reasonable expenses as may be shown to the satisfaction of the Local Government to have been incurred by the promoters, on account of any interference with the tramway that may be necessary for such crossing, shall be borne by the administration of the railway or tramway authorised to cross:

Provided that the Local Government shall have absolute power, for the purpose of this clause, to decide the question as to the reasonableness of the expenses incurred by the promoters on account of the interference with the tramway.

When the tramway interferes with the location or extension of any railway.

37. In case it hereafter be found that any portion of the alignment adopted by the promoters for the tramway interferes with the location of any new line of railway, or the extension of any existing line of railway, the alignment occupied by the tramway shall be forthwith, at the request of the Local Gov-

ernment, abandoned in favour of the railway, and the tramway shall be diverted in such way and in such manner as shall appear to an engineer or other officer duly appointed in this behalf by the Local Government to be fair and proper; provided that the actual cost of constructing such diversion shall be borne by the authorities of the said railway.

Restriction of alienation.

38. The promoters shall not transfer the undertaking or any part thereof by sale, mortgage, lease, exchange or otherwise, except with the previous sanction of, and under such conditions as may be approved by, the Government of the Punjab: Provided that they may transfer without further sanction to any limited company formed by them for constructing and working the tramway.

Liability of all works, &c., to inspection.

39. The undertaking and all works, stock, appliances and accounts appertaining thereto shall at all times be open to the inspection and examination of any person or persons whom the Government of the Punjab may appoint for the purpose, and the promoters shall afford all reasonable facilities for the inspection or examination of the officer making it.

Close of tramway or disuse of rolling-stock by order of the Government of the Punjab.

40. When after inspection of the tramway or a portion of the tramway or of any rolling-stock used thereon, the officer making the inspection under clause 39 reports to the Government of the Punjab that in his opinion the use of the tramway or any portion thereof or of any specified rolling-stock will be attended with danger to the public using it, the Government of the Punjab may direct that the tramway or the portion thereof be closed for the public conveyance of passengers or that the rolling-stock so specified shall no longer be used, as the case may be.

Tramway not to be re-opened after such order till sanction obtained.

41. When the tramway or any portion of the tramway has been closed under clause 40, it shall not be opened for the public conveyance of passengers unless and until it has been inspected and the opening sanctioned in accordance with the provisions of section 12 of the Indian Tramways Act, 1886.

Rolling-stock not to be used again after such order till sanction obtained.

42. When the Local Government has directed under clause 40 that any rolling-stock shall not be used, the rolling-stock shall not be used unless and until the officer named in clause 39 reports that it is fit for use and the Local Government sanctions its use.

On promoters' default works required by the Act may be executed by the Government at cost of promoters.

43. In the event of any work required by the Indian Tramways Act, 1886, or by this order to be done by the promoters not being done by them, the Government of the Punjab may cause a notice to be served on the promoters requiring them within a reasonable period to be prescribed in the said notice to execute the said work, and if within the period so prescribed such requirement is not complied with, the Government of the Punjab may cause such work to be done, and the cost thereof shall be recoverable from the promoters under section 36 of the said Act.

Penalty for failure of promoters to comply with Order.

44. If the promoters fail to observe the condition or direction contained in or made under this order, they shall for each such offence be liable to a penalty, which may extend to Rs. 200 and, in the case of a continuing offence, to a further penalty which may extend to Rs. 50 for each day after the first during which the offence continues to be committed.

Every penalty recovered under this clause shall be applied as the Local Government from time to time directs.

Statistics.

45. The promoters shall provide, without unreasonable delay, such statistics relating to the tramway or to the traffic thereon as may from time to time be required by the Local Government.

Concession in this order gives promoters no exclusive right as carriers on the road traversed by the tramway.

46. It is to be distinctly understood that no concession granted under this order confers on the promoters any exclusive right as carriers over any part of the tract traversed by the tramway. In the event of Government deciding to construct or granting a concession to construct a broad-gauge line between Jagádhri railway station on the North-Western Railway and Jagádhri city, the tramway shall be purchased outright either by Government or the concessionaire under the term specified in clause 47 of this order.

Termination of contract.

47. The local authority reserves the right to purchase the undertaking, with the previous sanction of the Local Government, at the expiry of 21 years after first opening throughout for traffic or at subsequent intervals of 10 years on 12 months' notice, the purchase price being 25 times the yearly average net earnings derived by the company from the tramway during the three years preceding the purchase with a maximum price of 120 and a minimum of 100 per cent. of the cost price on a rupee basis.

48. In the event of any dispute or difference arising between the promoters and the Local Government or the local authority touching this order or the construction thereof or as to the rights, duties and obligations arising thereunder or as to any other matter arising out of or connected with the subject-matter of this order, the same shall be referred for decision to two arbitrators, one to be appointed by each party to the dispute, and in the case of their not agreeing, to an umpire to be chosen by the arbitrators before the reference is proceeded with. This clause shall be deemed to be a submission to arbitration within the meaning of the second schedule of the Code of Civil Procedure, V of 1908.

49. The terms of this order are without prejudice to the power of the Governor-General in Council to extend the provisions of the Indian Railways Act, 1890, to the tramway.

The Draft Financial Statement.

2. On a day not later than the 5th day of January in every year, the Lieutenant-Governor shall appoint a Finance Committee for the the purpose of discussing the Draft Financial Statement and making proposals with reference thereto for the consideration of the Local Government.

3. (1) The Finance Committee shall consist of not more than twelve Members, of whom not more than half shall be nominated by the Lieutenant-Governor.

(2) The remaining Members of the Committee shall be elected by the non-official Members of the Council by votes given under such procedure as the Lieutenant-Governor may from time to time prescribe by notification in the local official Gazette.

4. The Finance Member shall be the Chairman of the Committee, and in the case of an equality of votes on any matter shall have a second or casting vote.

5. (1) On a day not later than the 18th day of January in every year, the Local Government shall refer to the Finance Committee the Draft Financial Statement.

(2) The draft shall comprise tabular statements showing—

(*a*) the opening balance of the Provincial account,

(*c*) the estimated Provincial expenditure, under specific major heads, on existing establishments and schemes and on new schemes the cost of which is not considerable or which the Local Government considers to be of an absolutely obligatory character,

(*d*) the amounts available for maximum recurring expenditure and for total expenditure upon other new schemes, the latter being provisionally included under a head 'Unallotted Expenditure,' and

(*e*) the estimated closing balance.

(3) There shall be appended to the Draft Financial Statement a memorandum indicating as fully as possible the manner in which the Local Government provisionally proposes to allot the sum available for total expenditure on new schemes referred to in clause (*d*) of sub-rule (2), and also indicating, if thought desirable, alternative methods of distributing this expenditure. In respect of each suggestion thus made, the maximum recurring expenditure, and the total expenditure, (*a*) recurring and (*b*) non-recurring, which it is proposed to incur in the next financial year, should be separately stated.

6. The Finance Committee shall consider how the provision made under the head 'Unallotted Expenditure' referred to in clause (*d*) of sub-rule (2) of rule 5 shall be distributed among the specific major heads and to what purposes the sums thus allotted should be applied:

Provided that—

(*i*) the total provision for recurring and non-recurring expenditure on the new schemes shall not exceed the amount entered in the Draft Financial Statement as available for these purposes; and

(*ii*) the limit of recurring expenditure shall be determined with reference to the maximum amount which a scheme will eventually involve, any difference between this figure and the recurring expenditure required to be provided in the Draft Financial Statement under discussion being made up by addition to non-recurring expenditure.

7. (1) The proceedings of the Committee shall be private and informal.

(2) They shall begin not later than the 20th day of January and be completed not later than the 27th day of the same month.

(3) Free discussion shall be allowed, but the Chairman may at his discretion close discussion upon any particular item when he thinks that it cannot be continued with advantage.

(4) Where the question of making any particular provision in the estimates coming within the scope of the Committee's functions is in dispute, the Member in charge shall be heard in its support, and the Committee shall then proceed to vote, the decision being by majority of votes.

8. The Finance Committee shall submit to the Local Government, not later than the 28th day of January, a report indicating the changes which it recommends in the Draft Financial Statement.

9. After considering the proposals of the Committee the Local Government shall embody its own conclusions in the Draft Financial Statement, and shall refer the Statement thus amended to the Government of India.

(2) It shall comprise a memorandum by the Finance Member explaining the general financial situation of the province in the current and ensuing years, together with memoranda explaining the estimates of revenue and expenditure under the various major heads, or groups of major heads.

(3) A week before the Revised Financial Statement is presented to the Council, copies of the amended Draft Financial Statement, as provisionally approved by the Government of India at the time, shall be supplied to the Members with a note that the figures and remarks contained in it are liable to alteration.

(4) Copies of the Revised Financial Statement, together with copies of a memorandum detailing the alterations made in the Statement of which copies have been previously supplied under sub-rule (3), shall be supplied to the Members not later than the day preceding that on which the Statement is presented to the Council.

11. (1) On the day when the Revised Financial Statement is presented to the Council, each head or group of heads in the Statement, which is specified in the schedule appended to these rules as being open to discussion, shall be considered separately according to such grouping as the Member in charge may determine.

(2) The consideration of each such head or group of heads shall be introduced by the Member in charge with such explanations supplementing the information contained in the Revised Financial Statement, as may appear to him to be necessary.

(3) Any Member shall then be at liberty to move any resolution relating to any question covered by any such head or group of heads which may be entered in his name in the List of Business and the Council shall thereupon proceed to discuss every such resolution in the manner hereinafter prescribed.

(*d*) it shall not challenge the accuracy of the figures of the Revised Financial Statement ;

(*e*) it shall be directly relevant to some entry in the Revised Financial Statement ;

(*f*) it shall not criticise any decision of the Government of India in respect of Provincial finance; and

(*g*) if it would in itself have the effect of causing the total expenditure of the province to exceed the amount sanctioned by the Government of India, it must propose some counterbalancing reduction in the estimates so as to avoid such excess.

14. A Member, who wishes to move a resolution, shall give notice in writing to the Secretary, prior to the date on which the Revised Financial Statement is presented to the Council, and he shall at the same time submit a copy of the resolution which he wishes to move:

Provided that the President may fix a date after which no such notice of resolution may be received.

15. The President may disallow any resolution or part of a resolution without giving any reason therefor other than that in his opinion it cannot be moved consistently with the public interests or that it should be moved in the Legislative Council of the Governor-General.

(2) A resolution that has been disallowed shall not be entered in the proceedings of the Council.

Nomination of candidates.

12. (1) Simultaneously with the publication of the list referred to in rule 9 (2), the Deputy Commissioner or such other officer as he may appoint for the purpose shall publish a notice intimating the number of vacancies for which candidates are to be elected and calling on intending candidates to submit their applications in the prescribed form within one week from the date of the publication of such notice.

Publication of notice as to vacancies, &c.

(2) On the expiration of the week referred to in clause (1) the Deputy Commissioner shall publish a further notice containing the names of the candidates who have been proposed, and intimating that all objections to the regularity of the proposal forms or the eligibility of the candidates must be made within one week from the date of publication of the notice. No objection unless lodged within the week will be entertained. During the week in question the proposal forms will be open to inspection at the Deputy Commissioner's office.

(3) The Deputy Commissioner or such other officer as he may appoint will consider all such objections. If the objection is on the score of irregularity in the proposal form the Deputy Commissioner or such other officer will decide whether the irregularity is such as to vitiate the proposal or not, and his decision shall be final, and no objection in respect of the same matter shall be made at any later stage of the election proceedings. If the objection is on the score of ineligibility as regards status the Deputy Commissioner or such other officer shall enquire into the eligibility or otherwise of the candidate and shall, subject to the following proviso, allow or disallow the candidature:

Provided that if the objection is taken under clause (2) or clause (4) of rule 5, the Deputy Commissioner may permit the candidature to proceed, and shall through the usual channel under the said clause (2) obtain the orders of the Local Government as to any exemption from the restriction thereby imposed, or under the said clause (4) ascertain the opinion of the Local Government as to the effect of the alleged defect of character, and the Election Board shall under rule 22, clause (3), annul the election of any elected candidate disqualified by the decision of Government thus elicited. Such order of the Election Board annulling the election under this rule shall be final.

Time of election.

13. The election shall be held at such time and places as the Deputy Commissioner may by written order and public notice direct, the date being timed so as to allow of newly elected members taking office on the expiry of the term of office of the outgoing members.

Poll when necessary.

14. If the number of the qualified candidates duly proposed under rule 10 exceeds the number of vacancies a poll shall be taken, otherwise such candidates shall be deemed to have been duly elected.

Time and place of polls.

15. The poll or polls will be held at such time and place or places as the Deputy Commissioner may direct and may, if necessary, last more than one day.

Mode of election.

16. The voting will be by ballot on a paper in the following form:—

Serial No.	Names of candidates.	Cross after the name of the candidate for whom the vote is given.

The procedure in the polling booth will be as follows:—

The voters will pass the voting table one by one and each will present his certificate bearing the thumb mark impression or signature, as the case may be, which establishes his identity, and give his name and address to the presiding officer or his clerk, who will verify it on the register and tick off the name. The number of the voter will be written on the ballot paper and counterfoil and the ballot paper stamped with an official stamp. The voter will then mark a (X) on the ballot paper in the space to the right of the name for which he votes, show the stamp on the back of the ballot paper to the officer and place the paper in the ballot box which will be locked and sealed.

Accidentally spoiled ballot papers may be exchanged, and blind or illiterate voters may have their votes marked for them by the presiding officer.

A voter claiming to vote after another has voted in his name will be given a green paper known as a "tendered" paper. The tendered vote will not be put in the ballot box, but will be kept apart, and its acceptance or non-acceptance will be decided by the Deputy Commissioner, whose decision will be final.

Exception to general mode of election.

17. (1) The Deputy Commissioner may, if he thinks fit, vary the above method of recording voters by permitting any particular or specified class of voters to send their votes by hand or by registered letter to the Deputy Commissioner or such other officer as may be appointed by him for the purpose, by such date and within such time as may be fixed.

(2) Voters who are thus exempted from personal attendance will be supplied with a ballot paper in the prescribed form, and will be required to score out the name or names of such candidate or candidates as they do not wish to vote for, place their initials against the name or names of such candidate or candidates they wish to vote for and sign the paper at foot and return the same within the prescribed period to the Deputy Commissioner or such other officer as may be appointed.

The voter's certificate should accompany the ballot paper in all such cases.

(3) Ballot papers bearing the following defects will be rejected :—

(a) Illegible signature or one not easily identifiable.

(b) Uncertainty as to the candidate or candidates to whom votes are given.

(c) The allotment of more than one vote to one candidate.

(d) The Deputy Commissioner or other officer aforesaid may in his discretion reject any ballot paper not accompanied by the voter's certificate.

Objections to vote.

18. (1) No objection shall be allowed at a poll to the vote of any registered voter except on the ground of personation, and such an objection must be made by one of the candidates, his agent or by the presiding officer himself at the time the vote is tendered.

(2) The presiding officer shall examine into the matter and then decide as to whether the vote should be recorded or not, and such decision shall be final and subject to no appeal.

Announcement of result.

19. (1) As soon after the close of the poll as possible the result of the voting shall be published under the authority of the Deputy Commissioner.

(2) The candidates who have the largest number of votes in the ward or class for which they stand shall be declared as being the duly elected members for that ward or class.

(3) In the case of two candidates for a single vacancy or for the last of several vacancies polling an equal number of votes, the senior in years shall be deemed to be elected.

Objections to return of any candidate.

20. (1) Any allegations of irregular practices or intimidation at elections as affecting the return of any candidate, must be made in writing by one of the candidates within one week from the announcement of the result of the election to a board, to be styled the election board, consisting of the Deputy Commissioner as president and two nominated members of the municipality selected by him.

(2) The Deputy Commissioner as president of this board may decline to make any enquiry regarding any such petition unless the petitioner gives security to the extent of not less than Rs. 50, and on the petitioner failing to do so may reject the petition.

(3) On receipt of such petition the Deputy Commissioner shall cause notice to be given to the candidates against whom petitions have been filed, and shall fix a day for the hearing of the petition.

(4) On the day so fixed the parties shall be duly heard by the election board, and such board shall then pass orders confirming or annulling the election, and such orders shall not be subject to appeal.

(5) The board may in the event of the petition being dismissed direct the petitioner to pay as cost such sum, not exceeding Rs. 50, as may be determined upon.

Mode of filling up casual vacancies.

21. When a vacancy occurs among the elected members of the committee by death, resignation or removal and a new member has to be elected to fill the vacancy in accordance with section 12, sub-section (1), of the Punjab Municipal Act, XX of 1891, such election shall be conducted in the following manner :—

(1) (a) If the vacancy occurs among the European elected members the European members of the committee, whether elected or appointed by name or office, shall be the electors;

(b) If the vacancy occurs among the Muhammadan elected members the Muhammadan members of the committee, whether elected or appointed by name or office, and in the case of a vacancy among the Hindu elected members the Hindu members whether elected or appointed by name or office shall be the electors ; and

(c) In the case of there being an equality of votes the president shall have a casting vote.

(2) Any person qualified under rule 6 and not disqualified under rule 5 who may signify in writing to the Deputy Commissioner his willingness to serve on the committee, shall be eligible for election. The election shall be made at a special meeting of the committee held under the rules, and shall be decided in accordance with the majority of votes of members present who by clause (1) of this rule are entitled to be electors.

(3) The result of such election will be intimated to the Deputy Commissioner who will submit the same to Government for notification in the Gazette.

22. The president of the committee shall hold office for three years.

23. Members of the committee other than those appointed *ex-officio* shall hold office for three years.
